To explain the millennial shift away from the traditionally dark Protestant post-Enlightenment Gothic, Nelson studies the complex arena of contemporary Gothic subgenres that take the form of novels, films, and graphic novels. She considers the work of Dan Brown and Stephenie Meyer, graphic novelists Mike Mignola and Garth Ennis, Christian writer William P. Young (author of The Shack), and filmmaker Guillermo del Toro. She considers twentieth-century Gothic masters H.P. Lovecraft, Anne Rice, and Stephen King in light of both their immediate ancestors in the eighteenth century and the original Gothic--the late medieval period from which Horace Walpole and his successors drew their inspiration. Fictions such as the Twilight and Left Behind series do more than follow the conventions of the classic Gothic novel. They are radically reviving and reinventing the transcendental worldview that informed the West's premodern era. As Jesus becomes mortal in The Da Vinci Code and the child Ofelia becomes a goddess in Pan's Labyrinth, Nelson argues that this unprecedented mainstreaming of a spiritually driven supernaturalism is a harbinger of what a post-Christian religion in America might look like.

When two Navy F-14 Tomcats engaged and shot down two Sukhoi Su-22 jet

fighters in 1981, they drew on experience and tactics that they had learned from a previous encounter with MiG jet fighters. The difference between the two encounters was that in the first, the enemy fighters were flown by American pilots assigned to a top secret squadron hidden at a remote airfield in the ultra-secret Tonopah Nuclear Test range, Nevada. In the second, the Sukhoi fighters were flown by Libyan pilots attempting to enforce Colonel Qaddafi's 'Line of Death' over the Gulf of Sidra. From the mid-1960s until the end of the Cold War, the United States Air Force acquired and flew Russian-made MiG jets, eventually creating a secret squadron dedicated to exposing American fighter pilots to enemy MiGs. Following underperformance in the Vietnam War, the USAF began to study MiGs in order to improve fighter pilot training. This then developed into the "black" Constant Peg program. In this program, MiGs were secretly acquired, and made airworthy, a difficult task without manuals or parts. A secret base was found to operate the planes from; and then ace pilots were found and trained to not only fly the assets, but fly them as they were flown by America's enemies. Finally, a program of exposing American fighter pilots to the MiGs was developed. In all, more than 1,600 American fighter pilots would train against America's secret MiGs between 1974 and 1989. Uncovering the story of the secret MiGs in America during the Cold War, and specifically Constant Peg and the 4477th Test & Evaluation Squadron, is a challenge because much of the information has been destroyed, or remains classified. To piece together the story of this group of men who provided America's fighter pilots with a level of training that was the stuff of dreams, author Steve Davies has interviewed over thirty of the Red Eagle pilots, along with other members of the squadron. This paperback edition includes new material on HAVE IDEA and other HAVE programs; making the MiGs airworthy in 1977 from the maintainers' perspective; and the intelligence activities of MiG expert at the Foreign Technology Division Mike Coyle. The result is a fascinating glimpse into a "black" program that enabled American fighter pilots to go into combat having already met and defeated their first MiG.
