This historically organized introductory text, which begins with Hesiod and goes up to Derrida and Quine, presents philosophy as an ongoing conversation about humankind's deepest and most persistent concerns. The Great Conversation traces the exchange of ideas between history's key philosophers, demonstrating that while constructing an argument or making a claim, one philosopher almost always has others in mind. The book is also available in two volumes: Volume I covers Hesiod through Descartes (Chapters 1-13); Volume II includes "Moving from Medieval to Modern" (Chapter 12), and coverage of Descartes through Derrida and Quine (Chapters 13-25).

In the years between 1848 and 1918, the Habsburg Empire was an intensely pluricultural space that brought together numerous “ nationalities ” under constantly changing — and contested — linguistic regimes. The multifaceted forms of translation and interpreting, marked by national struggles and extensive multilingualism, played a crucial role in constructing cultures within the Habsburg space. This book traces translation and interpreting practices in the Empire ’ s administration, courts and diplomatic service, and takes account of the “ habitualized ” translation carried out in everyday life. It then details the flows of translation among the Habsburg crownlands and between these and other European languages, with a special focus on Italian — German exchange. Applying a broad concept of “ cultural translation ” and working with sociological tools, the book addresses the mechanisms by which translation and interpreting constructs cultures, and delineates a model of the Habsburg Monarchy ’ s “ pluricultural space of communication ” that is also applicable to other multilingual settings. The distinction between ancient and modern modes of historical thought is characterized by the growing complexity of the discipline of history in modernity. Consequently, the epistemological and methodological standard of ancient historiography is typically held as inferior against the modern ideal. This book serves to address this apparent deficit. Its scope is three-fold. Firstly, it aims at encountering ancient modes of historical and historiographical thought within the province of their own horizon. Secondly, this book considers the possibility of a dialogue between ancient and modern philosophies of history concerning the influence of ancient historical thought on the development of modern philosophy of history and the utility of modern philosophy of history in the interpretation of ancient historiography. Thirdly, this book explores the continuities and discontinuities in historical method and thought from antiquity to modernity. Ultimately, this volume demonstrates the necessity of re-evaluating our assumptions about the relation of ancient and modern historical thought and lays the groundwork for a more fruitful dialogue in the future.
