Written first and foremost as a teaching tool, Torts: Cases and Materials, is a casebook that engages students without avoiding the hard questions. Modeled on the venerable Prosser casebook, but intended to be modern, accessible, and yet sophisticated, this book consistently gets high marks from students for being clear, user-friendly, and not playing hide-the-ball like so many other casebooks. Challenging hypotheticals and authors' dialogues engage students while allowing instructors to probe more deeply into ambiguous or developing areas of law. The book's manageable length makes it ideal for a three- to four-hour introductory Torts course. New to the Fifth Edition: Cases that are judiciously edited, so as to let the judges' voices be heard, along with the inclusion of dissenting opinions where important. Numerous recent cases have been added both in the notes and as principal cases, while old material has been pruned back to reduce unnecessary bulk. Continued integration of the Third Restatement throughout the book, including caselaw development following the new Restatement (particularly in the area of foreseeability, duty, and proximate cause). Professors and student will benefit from: Text designed to clarify the law, not further befuddle students. Explanations, note cases, and hypotheticals that are aimed at increasing understanding. Writing style written in a conversational manner to be plain-spoken and transparent about both the law and the authors' pedagogical goals.

The new edition focuses on the current

controversies in Tort law. Changes in the law endorsed by the Restatement (3rd) are explored. The casebook strives to invigorate the study of intentional torts by going beyond the traditional personal injury approach. Battery is considered in its increasing application in environmental litigation. The torts of intentional interference with contractual and economic relations, which almost all students will encounter in whatever field of practice (e.g. corporate, entertainment, public interest) they ultimately choose are introduced in the basic intentional tort section including the case that nearly bankrupt Texaco and the potential liability of an environmental public interest group for encouraging a boycott. The negligence section addresses controversies ranging from parental liability for failure to prevent a child from committing homicides, mental distress for exposure to toxic pollutants to tobacco industry liability. The necessity defense is considered in the context of Katrina. Negligence is critiqued from feminist, economic and other perspectives. Cases have been selected for their teachability and stimulation for students. Notes are straight forward to allow professors freedom to focus on policy concerns.

It unconventionally begins with strict liability. A recent study published by the Arizona State Law Journal shows that this sequence results in students experiencing a greater appreciation of "the judge's role as being influenced by social, economic, and ideological factors and a sense of fairness and less as a process of rule application than do students who begin their study with either intentional torts or negligence." The Sixth Edition is more accessible to students because of substantially expanded textual explanations and more tightly edited opinions. Updates include frequent discussions of Restatement (Third) provisions and a significant number of recently decided cases including several from the Supreme Court addressing products preemption, displacement in climate change litigation, and First Amendment limits on liability for intentional infliction of emotional distress. Comprehensive Changes A new appendix to the casebook, "The Litigation Process," facilitates the student's introduction to the torts litigation process. Relevant provisions of the recently adopted Restatement (Third) of Torts are quoted throughout the text. The Sixth Edition adds an unusual number of recently decided cases, including several from the Supreme Court of the United States addressing issues such as preemption, displacement in climate change litigation, and First Amendment limits on the tort of intentional infliction of emotional distress. The amount of textual

explanation in introductions and in notes has been greatly expanded to facilitate the student's understanding. In addition, the enhanced notes often ask students to consider newly added questions as they read the opinions and prepare for classroom discussion. The excerpted opinions are more tightly edited. The chapter in the previous edition that addressed damages has been split into two chapters, one covering "Damages" and the other, "Other Limitations on Liability Based on Type of Harm."
