A solution-focused guide to making a difference in the face of today's international water crisis features essays by such top environmental writers as Bill McKibben, Maude Barlow, and Vandana Shiva on a range of topics, from privatization and conservation to American public policy and the experiences of indigenous cultures. Original.
Little Things That Stick In The Mind Running PressBook Pub
The key novelty of this book is first of all in the successful attempt to conduct jointly modeling of environment in terms of physical environment related parameters and measuring similar parameters by means of multispectral remote sensing, primarily by means of passive microwave remote sensing technology. Another new step is in the development and utilization of a multilevel approach which includes remote sensing of the land and water parameters like soil moisture, depth to water table, biomass of vegetation, temperature and salinity of water, in situ measurements of similar parameters and incorporation of GIS and data sets into the models of typical environments. The part of book, which contains remote sensing is focused on multipurpose observations from aircraft obtained in many soil-climatic zones in different countries and is reach of the examples of practical application. Applied mathematicians, geophysics, hydrologists, socio-economists, statesmans and other researchers of environmental changes will find a wealth of information and ideas in this book.

Tough Questions - Biblical Answers Part II Lulu Press, Inc
The primary function of this book is to serve as a guide to the selection of books for children, recognizing the vast range of books published and the individual rates of reading and social development of different children.

Tough Target Walter de Gruyter
The impact of information technology in the field of military decision making is superficially less visible than that of a number of other weapon developments, though its importance has grown steadily since the beginning of the 1980s. Owing to its potential role in modern weapon systems and the prospect of its inclusion as an essential ingredient in many military projects such as the Strategic Defence Initiative, it has become the focus of special interest and efforts. This book is the first attempt to present a broad overview of the prospects for information technology in general, and machine intelligence in particular, in the context of international security. The dangers and promises of weapon and arms control applications of computers and artificial intelligence to decision-making processes are analysed in a technical, strategic, and political perspective by experts from six different countries. In an introductory chapter, Allan Din presents a generic overview of artificial intelligence and its prospects. Thirteen contributors then discuss the conceptual and technical framework of artificial intelligence, analyse implications for weapon systems and strategy, and discuss possible applications to arms control verification and modelling.

The Only Guide to Alternative Investments You'll Ever Need B&H Publishing Group
"0" is a revolutionary literary work written by a mysterious author known only as Existence - who prefers to be addressed as the numeric value of 1.This logic behind this strange, 0-1 juxtaposition becomes crystal clear as the reader and Existence (1) move through 13.8 billion years (and one trillionth of a second) of existential history. Many of life's most confusing situations and painful experiences are explained along with the mystery surrounding how something can emerge from nothing.After laying down some rather strict guidelines, Existence (1) takes the reader on a controversial journey back in time, to the time before time, where the preexistence of existence is detailed in reader-friendly terms. Science, religion, atheism, quantum theory, history, consciousness, good, evil, and many other human constructs fall under 1's merciless scalpel of truth as humanity's final chapter is revealed. Existence (1) has graciously provided our species with a single opportunity to change our destiny within the pages of this strange, unorthodox book. However, it is up to us to take heed because second chances cannot be offered to a nonexistent species. Learn how everything came to be, why you exist, your purpose in life, the reason for suffering, why life

evolves, and the fate of humanity should we fail to change our polarized direction. If you have never been satisfied with the mainstream explanations for your existence, then "0 by 1" has an alternative that will blow you away! "Existence pushes forward. Existence takes chances. Existence evolves!" - 1
Canadian Cents 1920-2012 Courier Corporation

Each passing year bears witness to the development of ever more powerful computers, increasingly fast and cheap storage media, and even higher bandwidth data connections. This makes it easy to believe that we can now – at least in principle – solve any problem we are faced with so long as we only have enough data. Yet this is not the case. Although large databases allow us to retrieve many different single pieces of information and to compute simple aggregations, general patterns and regularities often go undetected. Furthermore, it is exactly these patterns, regularities and trends that are often most valuable. To avoid the danger of “drowning in information, but starving for knowledge” the branch of research known as data analysis has emerged, and a considerable number of methods and software tools have been developed. However, it is not these tools alone but the intelligent application of human intuition in combination with computational power, of sound background knowledge with computer-aided modeling, and of critical reflection with convenient automatic model construction, that results in successful intelligent data analysis projects. Guide to Intelligent Data Analysis provides a hands-on instructional approach to many basic data analysis techniques, and explains how these are used to solve data analysis problems. Topics and features: guides the reader through the process of data analysis, following the interdependent steps of project understanding, data understanding, data preparation, modeling, and deployment and monitoring; equips the reader with the necessary information in order to obtain hands-on experience of the topics under discussion; provides a review of the basics of classical statistics that support and justify many data analysis methods, and a glossary of statistical terms; includes numerous examples using R and KNIME, together with appendices introducing the open source software; integrates illustrations and case-study-style examples to support pedagogical exposition. This practical and systematic textbook/reference for graduate and advanced undergraduate students is also essential reading for all professionals who face data analysis problems. Moreover, it is a book to be used following one’s exploration of it. Dr. Michael R. Berthold is Nycomed-Professor of Bioinformatics and Information Mining at the University of Konstanz, Germany. Dr. Christian Borgelt is Principal Researcher at the Intelligent Data Analysis and Graphical Models Research Unit of the European Centre for Soft Computing, Spain. Dr. Frank Höppner is Professor of Information Systems at Ostfalia University of Applied Sciences, Germany. Dr. Frank Klawonn is a Professor in the Department of Computer Science and Head of the Data Analysis and Pattern Recognition Laboratory at Ostfalia University of Applied Sciences, Germany. He is also Head of the Bioinformatics and Statistics group at the Helmholtz Centre for Infection Research, Braunschweig, Germany.
Growing and Knowing: A Selection Guide for Children's Literature John Wiley and Sons

Du suchst ein lustiges Geschenk für einen stolzen Landwirt? Dann ist dieses "Pig whisperer" Notizbuch mit einem rennenden Schwein hier perfekt für dich! Dieser Kalender wird ihm bestimmt gefallen! Schau dir auch unsere anderen Notizbücher für die Landwirtschaft an, vielleicht findest du ein anderes, das dir auch gut gefällt! Dort gibt es auch karierte, linierte und blanko Notizbücher.

TouchPoints for Men Stockholm International Peace Research Institute
The traditionally separate Fixed, Mobile, and Internet sectors have been evolving recently toward a single sector, offering numerous implications for those involved in technology and business. It is therefore essential for telecommunication professionals to get a keen grasp of where the industry is heading. Providing a solid foundation in the industry, Introduction to Mobile Communications: Technology, Services, Markets explores the core requirements of modern mobile telecommunications-from markets to technology. It explains how wireless systems work, how mobility is supported, the underlying infrastructure, and what interactions are needed among the different functional components. The book also examines how mobile communications are evolving in order to meet the changing needs of users. The information provided in the book comes primarily from the four core modules of the Certificate in Mobile Communications Distance Learning program run by the Informa Telecoms Academy in London. Designed by a highly experienced training development team, the program examines the complex and fascinating world of mobile communications. Designed to give a broad picture of mobile communications, the book provides an excellent grounding for those involved in both business and engineering-leaving them much better equipped to fulfill roles within their current or prospective companies

Introduction to Abstract Analysis Greenwood
The rewards of carefully chosen alternative investments can be great. But many investors don't know enough about unfamiliar investments to make wise choices. For that reason, financial advisers Larry Swedroe and Jared Kizer designed this book to bring investors up to speed on the twenty most popular alternative investments: Real estate, Inflation-protected securities, Commodities, International equities, Fixed annuities, Stable-value funds, High-yield (junk) bonds, Private equity (venture capital), Covered calls, Socially responsible mutual funds, Precious metals equities, Preferred stocks, Convertible bonds, Emerging market bonds, Hedge funds, Leveraged buyouts, Variable annuities, Equity-indexed annuities, Structured investment products, Leveraged funds The authors describe how the investments work, the pros and cons of each, which to consider, which to avoid, and how to get started. Swedroe and Kizer evaluate each investment in terms of: Expected returns Volatility Distribution of returns Diversification potential Fees Trading and

operating expenses Liquidity Tax efficiency Account location Role in an asset-allocation program Any investor who is considering or just curious about investment opportunities outside the traditional world of stocks, bonds, and bank certificates of deposit would be well-advised to read this book.

From the heart of The Velvet a writing community built around the fervent love of neo-noir fiction comes an original anthology. Stacked with brilliant emerging writers alongside some of the strongest established voices in contemporary literature, WARMED AND BOUND crosses literary boundaries on all sides, to deliver an altogether unique reading experience. Through seemingly opposed conventions, beautiful prose makes a hard impression on the short story form. From a scary love story to a nostalgic thriller, a hardboiled pursuit of salvation to the black humor that is existentialism, WARMED AND BOUND is rogue humility and lovesick noir, where humanity is a dirty puzzle. It 's Velvet Noir. Welcome. Matt Bell Tim Beverstock Blake Butler Vincent Louis Carrella Craig Clevenger Craig Davidson Chris Deal DeLeon DeMicoli Christopher J Dwyer Brian Evenson Sean P Ferguson Amanda Gowin JR Harlan Gordon Highland Anthony David Jacques Mark Jaskowski Jeremy Robert Johnson Stephen Graham Jones Nik Korpon Gary Paul Libero Kyle Minor Doc O Donnell J David Osborne Rob Parker Bob Pastorella Gavin Pate Cameron Pierce Edward J Rathke Caleb J Ross Bradley Sands Axel Taiari Richard Thomas Brandon Tietz Gayle Towell Paul Tremblay Pela Via Craig Wallwork Nic Young"The writers of the Velvet are contemporary fiction 's most effective and least self-conscious aesthetic guerrillas . . . The result is fiction at once conceived from high artistic intent and executed with depraved populist energy." Steve Ericksonauthor of Zeroville and The Sea Came in at Midnight

The Path to Salvation Springer Science & Business Media

Computer Systems Organization -- Processor Architectures.

The Pocket Guide to Restorative Justice St Herman Press

Examines the life of Paul the Apostle using Biblical passages and studies of ancient Jewish life in Biblical times and finds lessons of faith, humility, and self-sacrifice which modern Christians can apply to their own lives.

Invitation to Mathematics Triumph Books (IL)

How parents can deal with drug abuse.

Introduction to Mobile Communications: Technology, Services, Markets Springer Science & Business Media

This pocket-sized guide covers every stage of the process, from how a facilitator should prepare for taking on a new case, through initial contacts with victim and offender and facilitating meetings, to recording and evaluating a case. This is an invaluable companion for any professional needing to know about restorative justice.

Internet Resources and Services for International Business Elsevier

"Interaction design has many dimensions to it. It addresses how people deal with words, read images, explore physical space, think about time and motion, and how actions and responses affect human behavior. Various disciplines make up interaction design, such as industrial design, cognitive psychology, user interface design and many others. It is my hope that this book is a starting point for creating a visual language to enhance the understanding of interdisciplinary theories within interaction design. The book uses concise descriptions, visual metaphors and comparative diagrams to explain each term's meaning. Many ideas in this book are based on timeless principles that will function in varying contexts"--Provided by author.
