Few scholars have been as influential in finance, both as an academic field and an industry, as Eugene Fama. Since writing his groundbreaking 1970 essay on efficient capital markets, Fama has written over 100 papers and books that have been cited hundreds of thousands of times. Yet there is no one collection where one can easily find his best work in all fields. "The Fama Portfolio" will be an outstanding and unprecedented resource in a field that still concentrates mainly on questions stemming from Fama's work: Is the finance industry too large or too small? Why do people continue to pay active managers so much? What accounts for the

monstrous amount of trading? Do high-speed traders help or hurt? The ideas, facts, and empirical methods in Fama's work continue to guide these investigations. "The Fama Portfolio" will be a historic and long-lasting collection of some of the finest work ever produced in finance."

Latin America is a megadiverse territory hosting several hotspots of plant diversity and many types of forest biomes, ecosystems and climate types, from tropical rainforest to semi-arid woodlands. This combination of diverse forests and climates generates multiple responses to ecological changes affecting the structure and functioning of forest ecosystems. Recently, there have been major efforts to improve our understanding of such impacts on ecosystems processes. However, there is a dearth of studies focused on Latin-American forest ecosystems that could provide novel insights into the patterns and mechanisms of ecological processes in response to environmental stress. The abundance of "New World" tree species with dendrochronological potential constitutes an ideal opportunity to improve the ecological state of knowledge regarding these diverse forest types, which are often threatened by several impacts such as logging or conversion to agricultural lands. Thus, detailed information on the dendroecology of these species will improve our understanding of forests in the face of global change. Accordingly, this book identifies numerous relevant ecological processes and scales, ranging from tree species to populations and communities, and from both dendrochronological and dendroecological perspectives. It offers a valuable reference guide for the exploration of long-term ecological interactions between trees and their environmental conditions, and will foster further research and international projects on the continent and elsewhere.

Have you ever experienced burn out as a believer? What do you do when your faith feels stuck in a rut? While some focus on being more disciplined, there is another solution. Christianity is not about perfecting your spiritual routines. Freedom in Christ should lead to our souls being released, not restricted. How do we access a Christian walk that is refreshing and full of joy when we have become used to experiencing something less rewarding? Most well-meaning believers are unaware they have slipped into legalism. Further complicating this Christian

performance trap is that you appear passionate and excited all the up to burning out.You can only run on this spiritual treadmill for so long before you realize you are going nowhere. The frustration of always moving but never arriving is enough to cause anyone to become discouraged and give up. In Surviving Religious Burnout, I hope to help you escape this pattern of exhaustion. This book will help you get out of your spiritual rut and into an enjoyable, meaningful Christianity. To do this, we will dig up the roots of burnout and plant seeds of truth that will lead to a flourishing faith.

This is the eBook version of the printed book. If the print book includes a CD-ROM, this content is not included within the eBook version. Advanced Linux Programming is divided into two parts. The first covers generic UNIX system services, but with a particular eye towards Linux specific information. This portion of the book will be of use even to advanced programmers who have worked with other Linux systems since it will cover Linux specific details and differences. For programmers without UNIX experience, it will be even more valuable. The second section covers material that is entirely Linux specific. These are truly advanced topics, and are the techniques that the gurus use to build great applications. While this book will focus mostly on the Application Programming Interface (API) provided by the Linux kernel and the C library, a preliminary introduction to the development tools available will allow all who purchase the book to make immediate use of Linux.

On the 20th of January 1526, the Santiago left Lisbon bound for Africa with a cargo of iron and cloth; by early October the ship was back in Portugal with a very different cargo, 108 enslaved Africans. This volume consists of a translation into English of the receipt book from the customs office of the Cape Verde Islands. In it, Portuguese customs agents recorded import duties on over 3,000 slaves transported from nearby West Africa in 36 ships. The book also provides details of export taxes paid on c.600 African slaves by merchants from Portugal, Spain, and the Spanish Canary Islands, when they exchanged European merchandise for slaves. The final chapter of the volume translates the Santiago’s log, providing an example of an actual slave trading expedition. Taken together these documents open a rare window into the workings and scope of the early Atlantic slave trade.
