Upgrading and Repairing PCs is the runaway best-selling PC hardware book of all time and one of the best-selling computer books ever! This 15th Edition is loaded with the most up-to-date hardware information anywhere. World-renowned PC hardware expert Scott Mueller has taught thousands in his weeklong seminars and millions through his books, videos and articles. This edition contains hundreds of pages of new material, including the latest in processor and motherboard technologies. The DVD offers you more than two hours of high quality video plus a searchable hard drive database, a searchable vendor database, and thousands of pages of legacy PC hardware coverage that can no

longer be included in the printed book, but that are invaluable to PC techs servicing older computers!

Written for aspiring "power searchers", this manual introduces more advanced ways to find information on the Internet. Rather than simply discussing how to use search engines, Bradley explains that there are four types of search engines (free text, index- or directory-based, multi- or meta-, and resource or site specific search engines) -- and then shows how they can work for you. Full explanations -- and examples -- of exploiting search tools through relevance ranking and search term choices are offered. Clearly laid out for easy use during searching sessions, the

text is packed with helpful screenshots, sidebars, icons, and searching tips. With recommendations for the most effective and reliable Internet tools, practical advice on configuring popular browsers, and tips for making the best use of software, this handbook is a must-have for librarians and patrons who search the Internet regularly.

Computers used to be for geeks. And geeks were fine with dealing with a difficult and finicky interface--they liked this--it was even a sort of badge of honor (e.g. the Unix geeks). But making the interface really intuitive and useful--think about the first Macintosh computers--took computers far far beyond the geek crowd. The Mac made HCI (human c
