The worldwide video game console market surpassed \$10 billion in 2003. Current sales of new consoles is consolidated around 3 major companies and their proprietary platforms: Nintendo, Sony and Microsoft. In addition, there is an enormous installed "retro gaming" base of Ataria and Sega console enthusiasts. This book, written by a team led by Joe Grand, author of "Hardware Hacking: Have Fun While Voiding Your Warranty", provides hard-core gamers with they keys to the kingdom: specific instructions on how to

crack into their console and make it do things it was never designed to do. By definition, video console game players like to have fun. Most of them are addicted to the adrenaline rush associated with "winning", and even more so when the "winning" involves beating the system by discovering the multitude of "cheats" built into most video games. Now, they can have the ultimate adrenaline rush---actually messing around with the soul of the machine and configuring it to behave exactly as the command. This book builds on the motto of "Have Fun While Voiding Your Warranty" and will appeal to the community of hardware geeks who associate unscrewing the back of their video console with para-jumping into the perfect storm. Providing a reliable, field-tested guide to hacking all of the most popular video gaming consoles Written by some of the most knowledgeable and recognizable names in the hardware hacking community Game Console Hacking is the first book on the market to show game enthusiasts (self described hardware geeks) how to disassemble, reconfigure, customize and re-purpose their Atari, Sega, Nintendo, Playstation and Xbox systems

The networking of combat vehicle simulators in SIMNET is a method of collective training that supplements field exercises. This report offers guidance for using the PC-based Unit Performance Assessment System (UPAS) to collect and analyze data from SIMNET exercises. This report is an updated version of ARI Research Product 92-02 accomplished to reflect the addition of new features and utilities during the application of UPAS as a training research tool. Additions to the UPAS include: company-level versions of existing platoon- level displays; a new type of map display (the Fire Fight) to better analyze how fires are distributed over space; a Fire Fight display; an After Action Review (AAR) Presentation Manager to capture, add comments to, and sequence data displays for an AAR or electronic Take Home Package; a mouse interface; the option to display an aggregate icon at platoon level; and the capability to display line-of-sight information.  
Handbook of New Product Development Management  
Since 9/11, terrorism has been at the forefront of global politics and international relations. This new edition has been thoroughly updated and provides a comprehensive compilation of international law documents relating to terrorism. Covering the main instruments passed by the United Nations, regional organizations and the State practice of the US and the UK on the issue of combating terrorism in one handy volume, it covers the most recent instruments in the field of combating terrorism, such as: the International Convention for the Suppression of the Financing of Terrorism the Financial Action Task Force Revised Forty Recommendations on Money Laundering the Special Recommendations on Money Laundering the Special Recommendations on Terrorist Financing. The collection is introduced by the authors with an explanation of the salient issues relating to terrorism and proposals on how it can be combated. International Law Documents Relating to Terrorism provides, in a single text, all the basic documents in international law relating to terrorism, paying particular attention to the Lockerbie bombing case and the developments since 9/11.
