Although fiction writers must concern themselves with "big picture" issues such as plot, theme, and character development, much of the day-to-day work of writing involves finding answers to seemingly minor questions: How should I describe the exterior of a house? How can I construct the voice of a historical narrator with authenticity? How should I depict a physically atypical character? Few books on the market address the problems and opportunities present in these and other questions, yet they are the ones that most writers grapple with on a daily basis. *Danger on the Page: A Fiction Writer's Guide to Sex, Violence, Dead Narrators, and Other Challenges* identifies and explores some of the more common and intractable situational challenges of fiction writing, with chapters grouped into the general subject areas such as scenes, characters, points of view, and settings. Shawver delves into the pitfalls and opportunities of writing about sex, violence, sports, and love; he examines writing from the perspective of a different race, gender, or

species; he interrogates conventional beliefs about the use of brand names, the description of architecture, and the portrayal of nature. Throughout, he gives dozens of examples from both literary and commercial fiction so readers can borrow (or reject) other writers' techniques and explore the myriad challenges of fiction writing on their own. A lively and witty approach to a diverse range of specific writing issues, Shawver's book will appeal especially to intermediate-level writers seeking to bring their craft to the next level.

*Ecocriticism and the Idea of Culture: Biology and the Bildungsroman* draws on work by Kinji Imanishi, Frans de Waal, and other biologists to create an interdisciplinary, materialist notion of culture for ecocritical analysis. In this timely intervention, Feder examines the humanist idea of culture by taking a fresh look at the stories it explicitly tells

about itself. These stories fall into the genre of the Bildungsroman, the tale of individual acculturation that participates in the myth of its complete separation from and opposition to nature which, Feder argues, is culture's own origin story. Moving from Voltaire's Candide to Mary Shelley's Frankenstein and from Virginia Woolf's Orlando to Jamaica Kincaid's Lucy, the book dramatizes humanism's own awareness of the fallacy of this foundational binary. In the final chapters, Feder examines the discourse of animality at work in this narrative as a humanist fantasy about empathy, one that paradoxically excludes other animals from the ethical community to justify the continued domination of both human and nonhuman others.
