Do Business Better Legare Street Press Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to

include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

Stanley Kubrick, director of the acclaimed films Path of Glory, Spartacus, Lolita, Dr. Strangelove, 2001: Space Odyssey. A Clockwork Orange, The Shining, and Full Metal Jacket, is arguably one of the greatest American filmmakers. Yet, despite being hailed as "a giant" by Orson Welles, little is known about the reclusive director. Stanley Kubrick—the first full-length study of his life—is based on assiduous archival research as well as new interviews with friends, family, and colleagues. Film scholar Vincent LoBrutto provides a comprehensive portrait of the director, from his high school days, in the Bronx and his stint as a photographer for Look magazine, through the creation of his wide-ranging movies, including the long-awaited Eyes Wide Shut. The author provides behind-the-scenes details about writing, filming, financing, and reception of the director's entire output, paying close attention to the technical innovations and to his often contentious relationships with actors. This fascinating biography exposes the enigma that is Stanley Kubrick while

placing him in context of film history.
