The Applications for Enrollment of Choctaw Newborn, Act of 1905, National Archive film M-1301, Rolls 50-57, are found under the heading of Applications for Enrollment of the Commission to the Five Civilized Tribes. These applications contain considerably more information than stated on the census cards found in series M-1186. Series M-1301 possesses its own numerical sequence, separate from M-1186. To find each party's roll number researchers must reference M-1186. The governing 1905 statute (H.R. 17474) defined Choctaw Newborn as "infant children born prior to September twenty-fifth, nineteen hundred and two, and who were living on said date, to citizens by blood of the Choctaw . . ." It also authorized the Department of the Interior to enroll and make allotments to such children based on applications received on their behalf no later than May 2, 1905. The Choctaw--as well as the Chickasaw allotments--were likely some of the most sought after properties in Indian Territory. There was supposed to be a 25-year restriction on the sale or lease of any Indian lands so as to ensure that the owners wouldn't be swindled; however, the presence of huge asphalt and coal deposits in both the Choctaw and Chickasaw Districts elicited pressure from private interests to purchase the lands. On April 26, 1906, President Roosevelt signed the Five Tribes Bill removing some of the restrictions from the sale of all inherited land but continuing to prohibit full-bloods from selling their land for 25 years. Mr. Bowen's faithful transcriptions of the Choctaw applications provide the names of the applicants and their relatives, as well as the identities of doctors, lawyers, midwives, and others.

Sudoku Genius Mind Exercises, Volume 1: Chinese Camp, California State of Mind Collection Description: 5x8 expertly bound book with 106 pages of simple to extreme Sudoku puzzles (solutions included!). All Book covers are designed by Coco Piracci -- they're collectable editions. Great for you or as a gift. Kids, teens, adults and seniors all love doing Sudoku. In Volume 1 of Sudoku Genius Mind Exercises: Chinese Camp, California State of Mind Collection, you have enough Sudoku puzzles for a whole month - one Sudoku a day! When you're done, get Volume 2. Once you start doing Sudoku puzzles, you'll never want to stop. And there's a good reason why! Just like physical exercise, your mind requires training too! Here are the marvelous advantages of playing Sudoku: Improves your memory: Your memory and logic are fully activated when you are playing Sudoku. We use our memory to remember numbers we are considering, and we use logic to figure out the potential answer in the next blank. Stimulates your mind: Playing Sudoku trains your logical thinking processing. It also helps you improve your numeracy skills. Reduces your chances of developing neurodegenerative diseases: Playing Sudoku keeps your brain stimulated. Improves your decision-making skills: Not only is playing Sudoku exciting, but it helps you learn how to make a decision and take action with less hesitation. Increases your concentration skills: Sudoku requires players to evaluate strategically and solve obstacles creatively. If you get interrupted in the middle of solving a puzzle, you'll have to restart the whole thinking process again, which helps you to develop your concentration and re-focusing skills. Feel Satisfied! Sudoku gives you a sense of fulfillment when you can

solve a puzzle, especially if the puzzle is a difficult one. By playing Sudoku daily, you'll learn how to solve puzzles faster and eventually advance to harder levels. Exercise your mind, and you will become more content and smarter too! From now on, play Sudoku every day. Note: We specialize in local publishing. We have many Sudoku Genius volumes available and other great books too! Drowning in \$20,000 of credit card debt, shopaholic Karyn Bosnak asked strangers for money online -- and it worked! What would you do if you owed \$20,000? Would you: A) not tell your parents? B) start your own website that asked for money without apology? or C) stop coloring your hair, getting pedicures, and buying Gucci? If you were Karyn Bosnak, you'd do all three. Karyn started a funny yet honest website, www.savekaryn.com, on which she asked for donations to help her get out of debt. Karyn received e-mails from people all over the world, either confessing their own debt-ridden lives, or criticizing hers. But after four months of Internet panhandling and selling her prized possessions on eBay, her debt was gone! In *Save Karyn: One Shopaholic's Journey to Debt and Back*, Karyn details the bumpy road her financial -- and personal -- life has traveled to get her where she is today: happy, grateful, and completely debt-free. In this charming cautionary tale, Karyn chronicles her glamorous rise, her embarrassing fall, and how the kindness of strangers in cyberia really can make a difference.

Angelic Sigils, Keys and Calls

Two gods. A world divided. One man and one woman destined to decide which god will control humanity's destiny for the next 1,000 years. For Mirah, who has a mind of her own and a will far outweighing her slight stature, her late father's general supply shop was the world. Then came a simple knock on the door one cold, winter night following an exhausting day. Her only goal being to dismiss whoever it was so she could get to bed, she answered it. Unfortunately, the two Knights on the other side had orders that would ultimately shatter her world. In the blink of an eye, she's ripped from the only life she's known and riding headlong into a destiny for which she was not prepared. A destiny she shares with a man named Rasmus who seems bent on killing her. Through dark forests, scorching deserts, snow covered mountains, and cursed land, she and her Knight Protectors; the arrogant Commander Roenin, patient Colonel Alyen, and fiery, red-headed Captain Samone; first learn about then struggle to fulfill the demands of a secret held by the Temple for the last one thousand years. A secret that will not only change Mirah's life forever, but the world as well.

Engineering Digital Design, Second Edition provides the most extensive coverage of any available textbook in digital logic and design. The new REVISED Second Edition published in September of 2002 provides 5 productivity tools free on the accompanying CD ROM. This software is also included on the Instructor's Manual CD ROM and complete instructions accompany each software program. In the REVISED Second Edition

modern notation combines with state-of-the-art treatment of important subjects in digital design to provide the student with the background needed to enter industry or graduate study at a competitive level. Combinatorial logic design and synchronous and asynchronous sequential machine design methods are given equal weight, and new ideas and design approaches are explored. The productivity tools provided on the accompanying CD are outlined below: [1] EXL-Sim2002 logic simulator: EXL-Sim2002 is a full-featured, interactive, schematic-capture and simulation program that is ideally suited for use with the text at either the entry or advanced-level of logic design. Its many features include drag-and-drop capability, rubber banding, mixed logic and positive logic simulations, macro generation, individual and global (or randomized) delay assignments, connection features that eliminate the need for wire connections, schematic page sizing and zooming, waveform zooming and scrolling, a variety of printout capabilities, and a host of other useful features. [2] BOOZER logic minimizer: BOOZER is a software minimization tool that is recommended for use with the text. It accepts entered variable (EV) or canonical (1's and 0's) data from K-maps or truth tables, with or without don't cares, and returns an optimal or near optimal single or multi-output solution. It can handle up to 12 functions Boolean functions and as many inputs when used on modern computers. [3] ESPRESSO II logic minimizer: ESPRESSO II is another software minimization tool widely used in schools and industry. It supports advanced heuristic algorithms for minimization of two-level, multi-output Boolean functions but does not accept entered variables. It is also readily available from the University of California, Berkeley, 1986 VLSI Tools Distribution. [4] ADAM design software: ADAM (for Automated Design of Asynchronous Machines) is a very powerful productivity tool that permits the automated design of very complex asynchronous state machines, all free of timing defects. The input files are state tables for the desired state machines. The output files are given in the Berkeley format appropriate for directly programming PLAs. ADAM also allows the designer to design synchronous state machines, timing-defect-free. The options include the lumped path delay (LPD) model or NESTED CELL model for asynchronous FSM designs, and the use of D FLIP-FLOPs for synchronous FSM designs. The background for the use of ADAM is covered in Chapters 11, 14 and 16 of the REVISED 2nd Edition. [5] A-OPS design software: A-OPS (for Asynchronous One-hot Programmable Sequencers) is another very powerful productivity tool that permits the design of asynchronous and synchronous state machines by using a programmable sequencer kernel. This software generates a PLA or PAL output file (in Berkeley format) or the VHDL code for the automated timing-defect-free designs of the following: (a) Any 1-Hot programmable sequencer up to 10 states. (b) The 1-Hot design of multiple asynchronous or synchronous state machines driven by either PLDs or RAM. The input file is that of a state table for the desired state machine. This software can be used to design systems with the capability of instantly switching between several radically different controllers on a time-shared basis. The background for the use of A-OPS is covered in Chapters 13, 14 and 16 of the REVISED 2nd Edition.

Create and swap mini works of art! The simple act of sharing 2½ x 3½ pieces of art, known as Artist Trading Cards, knows no boundaries and brings like-souls together like no other form of communication can. Unique statements, passionate emotions and favorite interests can all be expressed in these miniature works of art that are always traded, never sold. Artist Trading Cards Workshop will not only teach you how to create your own cards, combining one or more of the 25+ techniques demonstrated in step-by-step photos, it will also share the ins and outs of trading, finding and organizing card swaps and how to trade with others across the miles or even the continents. Discover ways to create colorful collage backgrounds, make cards from fabric, incorporate painting, stamping, phone book pages, tissue paper, string, stencils and much more—all is revealed in step-by-step photos, but that's not all. You'll also: Learn the ins and outs of trading—where to look, what to swap. Find creative ways to store the cards you'll soon be collecting. Be inspired by the cards from 60 talented contributors and over 200 beautiful cards.
