After 28 Years of Researching, Family History and Genealogy, and much prompting from a number of people, I'm writing this Genealogical Book, "Growing Your Family Tree - Sorting the Wheat from the Chaff". It will be of particular

interest to those with Ancestry in Nova Scotia, and Atlantic Canada, but the scope of the book does go beyond those areas, and I hope You enjoy it and it helps You with Your Family History and Growing Your Family Tree. ~ Brian W. Hurlburt

"Brian has sorted the wheat from the chaff in this most informative book on 'Growing Your Family Tree'. Beginning and Seasoned genealogists alike, will find it an essential, informative read!"

The previously untold story of the Zenith Trans-Oceanic, the world's most romantic and expensive series of portable radios. Long a companion of kings, presidents, transoceanic yachtsmen and world explorers, the Trans-Oceanic was also carried into battle by American troops in three wars. Its great

popularity in spite of a very high price can be laid at the feet of several generations of armchair travelers who used the shortwave capabilities of the Trans-Oceanic as a window on the world. With access to the Zenith corporate archives and their long experience as radio enthusiasts and writers for both the popular and scholarly press, Professors Bryant and Cones present the engrossing stories of the

development and use of the Trans-Oceanic throughout its forty year life. They present a wealth of never-before published photographs, documents and information concerning these fascinating radios, their collection, preservation and restoration. Graphic Communications Group

Independently Published When Plum Lovegrove finds herself being swallowed up in a beige and boring old age of lavender hand cream and proper pantyhose, she soon realises a

slow and steady decline into old age is not her thing. At 76 years of age, Plum is coming out of retirement. In no time she's set herself up as a life coach, she's got herself on the interwebs, and she's assembled a Grannie Hipster Squad who won't let their wrinkles determine their existence. With Plum's encouragement

, they set out to dust off their dreams and determine their own desires. A bunch of bored old ladies soon discover that it doesn't matter how long they've walked in the wrong direction, it's never too late to turn around! The Way to Win Steck-Vaughn This book presents the first comprehensive overview of the properties

and fabrication methods of GaN-based power transistors, with contribution s from the most active research groups in the field. It describes how gallium nitride has emerged as an excellent material for the fabrication of power transistors; thanks to the high energy gap, high breakdown field, and saturation velocity of GaN, these devices can reach breakdown voltages beyond the kV range, and very high switching frequencies, thus being suitable for application in power conversion systems. Based on GaN, switching-mode power converters with efficiency in excess of 99 % have been already demonstrated, thus clearing the way for massive adoption of GaN transistors in the power conversion market. This is expected to have important advantages at both the environmental and economic level, since power conversion losses account for 10 % of global
