"This book is about the people I met as I

plated car: the undefeated dreamers and wild-hearted romantics, the obsessed hobbyists and beautiful failures. It is about heroes and legends, illusions, delusions and hope, and one or two men with shit for brains who ought to be locked up." As anyone who's ever read Mark Dapin's column and features in Good Weekend knows, he's an immensely funny, acute and vivid observer of Australian life. In Strange Country, he takes us on a journey through a very different Australia - a country that's eccentric, puzzling, big-hearted, small-minded, nostalgic and sometimes just plain mad. From the last travelling boxing tent to feral urban sewer rats to Vietnam Veteran bikies and the annual Parkes Elvis Festival, his writing illuminates the stranger side of Australian life in a travel book like no other.

Before the groundbreaking graphic novel

Watchmen, Alan Moore made his debut in the U.S. comic book market with the revitalization of the horror comic book Swamp Thing. Moore's classic, critically acclaimed Swamp Thing stories are now collected with brand-new coloring in Absolute Swamp Thing by Alan Moore Vol. 1. In 1983, a revolutionary English writer joined a trio of trailblazing American artists to revitalize a longstanding comic book icon. By the time they'd finished their work four years later, SWAMP THING by Alan Moore, Stephen R, Bissette, John Totleben, and Rick Veitch was universally recognized as one of the handful of titles that defined a new era of complexity and depth in modern graphic storytelling, and their

run on the series remains one of the medium's most enduring masterpieces. Now DC Comics and Vertigo are proud to present an all-new vision of this landmark achievement. Comprising three deluxe hardcover volumes, ABSOLUTE SWAMP THING BY ALAN MOORE debuts completely new coloring for every page, crafted exclusively for this definitive collector's edition by legendary color artist Steve Oliff (Akira, Miracleman). This first volume includes the issues THE SAGA OF THE SWAMP THING #20-34 and SWAMP THING ANNUAL #2 and features a monumental new afterword from Bissette accompanied by a wealth of historic behind-the-scenes material from the title's original creative team.

Volume 2 of the book ' Sand Dunes of the Northern Hemisphere ' is sub-titled Characteristics, Dynamics and Provenance of Sand Dunes in the Northern Hemisphere. It brings together a vast body of information and insight into sand dune and desert systems from North Asia, Central Asia, North Africa and the Middle East. Chapters from the Russian Federation include studies on dune systems within the permafrost zone and there is a case study from temperate zone dune system in coastal Japan. Volume 2: Characteristics, Dynamics and Provenance of Sand Dunes in the Northern Hemisphere of 16 chapters in three Parts, focusses on Saharan Africa, Egypt, and Middle East and gives attention to sand mobility and encroachment with case studies from a number of countries where these matters are of concern. We also include chapters on the remote dunes in the permafrost zone and in the hyper-arid deserts of Iran. Case studies are used to highlight the characteristics of dunes and their interaction with humans in several widely divergent settings. Volume 2 concludes with

some musing on the value of study of the past as key to the future and speculates on what the future might hold in the light of a warmer and drier Earth and a rise in sea level that threaten large tracts of low-lying land with marine incursions and destruction from storm surge. PART 4 Sand Mobility and Encroachment The seven chapters in this Part examine the real-world impact of sand encroachment and dune migration on people and their economic activities and the health, welfare and financial implications related to destruction of infrastructure, including human habitations. PART 5 Sand Dune Landscapes Distribution, Formation and Management Seven Case studies from several geographic regions in Africa, the Middle East, north-east Asia are presented here to demonstrate the underlying mechanisms in dune formation and the diverse approaches to their management. Human impacts such as sand mining, tourism development, combine with natural forces like climate variability to challenge the realization of an optimum management strategy. PART 6

Concluding Thoughts: Coping with an Unknown Future from a Little-known Past The two chapters in Part 6 have special roles. We are privileged to publish new research findings that are summarized here in Chapter 38 from extensive and detailed work conducted in the Kyzyl Kum, and Karakum sand seas of Central Asia. There is a strong belief that further study of the little-known past such as revealed in this study could unlock clues as to what a future Earth might look like. This leads on to speculation in Chapter 39 about the implications of what we already know about global change (not only climate change) and the impact of the Anthropocene on the dune systems, both inland and coastal. Sea level rise, marine incursions and an increase in extreme weather events will affect dune systems and sand seas on the Northern Hemisphere (and beyond).
