Mark Anthony Neal's *Looking for Leroy* is an engaging and provocative analysis of the complex ways in which black masculinity has been read and misread through contemporary American popular culture. Neal argues that black men and boys are bound, in profound ways, to and by their legibility. The most "legible" black male bodies are often rendered as criminal, bodies in need of policing and containment. Ironically, Neal argues, this sort of legibility brings welcome relief to white America, providing easily identifiable images of black men in an era defined by shifts in racial, sexual, and gendered identities. Neal highlights the radical potential of rendering legible black male bodies—those bodies that are all too real for us—as illegible, while simultaneously rendering illegible black male bodies—those versions of black masculinity that we can't believe are real—as legible. In examining figures such as hip-hop entrepreneur and artist Jay-Z, R&B Svengali R. Kelly, the late vocalist Luther Vandross, and characters from the hit HBO series *The Wire*, among others, Neal demonstrates how distinct representations of black masculinity can break the links in the public imagination that create antagonism toward black men. *Looking for Leroy* features close readings of contemporary black masculinity and popular culture, highlighting both the complexity and accessibility of black men and boys through visual and sonic cues within American culture, media, and public policy. By rendering legible the illegible, Neal maps the range of identifications and anxieties that have marked the performance and reception of post-Civil Rights era African American masculinity.

Slipping Through the Cracks DIANE Publishing This novel resource was written for educators and educational leaders, empowering them to meet the needs of traditionally underserved students, from acceptance to commencement and beyond. If you are committed to helping all students succeed in college, this book is for you. Using a three-pillar system informed by insights and research, Dr. Sherell Wilson's high-quality, solutions-focused, professional learning guide and workbook for schools, colleges, universities, and education nonprofits provides a research-informed model to improve outcomes and success for underserved college students. Only about 60 percent of students who enroll in college earn a degree within eight years, and that rate is significantly lower for racial and ethnic minority students and low-income students. Without the same equitable resources as their academic peers, these students often find it easier to simply transfer or drop out. The solution is not more outreach or support programs. Instead, the college experience itself must be fundamentally reevaluated for an increasingly diverse student population, and reshaped to address the deeper roots of the continuing lack of success. Understanding a student's motivation to continue college enrollment requires learning the key influences on their educational decision-making. Educational leaders need a reliable method that better identifies, measures, and

structures student achievement for diverse learner populations in a practical way. Dr. Wilson addresses the many challenges by using a multifaceted and comprehensive approach. As part of a solid strategy to inspire, inform, and empower educational leaders, the book addresses three main concepts called pillars: enabling successful student transitions, promoting student growth and development, and enhancing student motivation to persist. Each pillar is divided into two parts: to examine and understand (guide) and to explore and develop (workbook). It is an eminently practical and engaging book that includes a wealth of resources and activities, enhanced by students telling of their own experiences. Online bonus resources include a members-only community and more.

Though overall cancer incidence and mortality have continued to decline in recent years, cancer continues to devastate the lives of far too many Americans. In 2009 alone, 1.5 million American men, women, and children were diagnosed with cancer, and 562,000 died from the disease. There is a growing body of evidence linking environmental exposures to cancer. The Pres. Cancer Panel dedicated its 2008;2009 activities to examining the impact of environmental factors on cancer risk. The Panel considered industrial, occupational, and agricultural exposures as well as exposures related to medical practice, military activities, modern lifestyles, and natural sources. This report presents the Panel's recommend. to mitigate or eliminate these barriers. Illus. *Looking for Leroy* *Slipping Through the Cracks* Too often, clients with substance abuse and addiction problems achieve sobriety only

to relapse shortly after. As a clinician in the addiction treatment field, you are undoubtedly familiar with this common scenario, and it can be a source of extreme frustration. To make matters worse, clients may see their relapse as evidence of personal failure and inadequacy, and as a result, they may resist more treatment. What if you could break this cycle and help clients maintain their progress? Mindfulness-Based Sobriety presents a breakthrough, integrative approach to addiction recovery to help you treat clients recovering from substance abuse and addiction using mindfulness-based therapy, motivational interviewing, and relapse prevention therapy. Research has indicated that mindfulness-based therapy is highly effective in treating emotion dysregulation, stress, depression, and grief—all emotions that lie at the root of addiction. Motivational interviewing is helpful in treating addiction because it helps clients learn to change the behaviors that cause addiction. And finally, relapse prevention therapy teaches individuals with addiction to anticipate and cope with potential relapse. This book combines all three of these highly effective treatments. This powerful manual was developed by Gateway Foundation clinicians in order to better fulfill the mission of reducing substance abuse and co-occurring mental health problems. The book provides two curricula: an outpatient treatment curriculum and a residential treatment curriculum. Both are user-friendly and can be implemented in an open group format, which means that you can say goodbye to the days of tailoring one-on-one treatment to fit a group setting. The integrative approach outlined in this book will help your clients conquer substance abuse by identifying their own values, strengthening their motivation, and tackling other mental health problems that may lie at the root of their addiction. Furthermore,

the book's strong emphasis on relapse prevention means that you can help clients stay on the path to sobriety.

Reveals how psychedelics can facilitate spiritual development and direct encounters with the sacred • With contributions by Albert Hofmann, Huston Smith, Stanislav Grof, Charles Tart, Alexander "Sasha" Shulgin, Brother David Steindl-Rast, and many others • Includes personal accounts of Walter Pahnke's Good Friday Experiment as well

as a 25-year follow-up with its participants • Explores protocols for ceremonial use of psychedelics and the challenges of transforming entheogenic insights into enduring change Modern organized religion is based predominantly on secondary religious experience--we read about others' extraordinary spiritual encounters with God but have no direct experience ourselves. Yet there exist powerful sacraments to help us directly experience the sacred, to help us seek out the meaning of being human and our place in the universe, and to help us see the sacred in the world that surrounds us. In this book, more than 25 spiritual leaders, scientists, and psychedelic visionaries examine how we can return to the primary spiritual encounters at the basis of all religions through the guided use of psychedelics. With contributions by Albert Hofmann, Huston Smith, Stanislav Grof, Charles Tart, Alexander "Sasha" Shulgin, Brother David Steindl-Rast, Myron Stolaroff, and many others, this book explores protocols for ceremonial and spiritual use of psychedelics, including LSD, psilocybin, ayahuasca, and MDMA, and the challenges of transforming entheogenic insights into enduring change. It examines psychoactive sacraments in the Bible, myths surrounding the use of LSD, and the transformative ayahuasca rituals of Santo Daime. The book also includes personal accounts of Walter Pahnke's Good Friday Experiment as well as a 25-year follow-up with its participants. Dispelling fears of inauthentic spirituality, addiction, and ill-prepared encounters with the holy, this book reveals the potential of psychedelics as catalysts for spiritual development, a path through which faith can directly encounter God's power, and the beginning of a new religious era based on personal spiritual experience.

Based in part on her own family's journey, Ellen Van Vechten explains the science of addiction, the theory of treatment, and the twelve-step model of recovery, providing sensible information and tips for reasoned action in support of a loved one while fostering personal growth and recovery. Powerlessness over another's addiction has a caustic effect on the family. Too often parents and partners equate "letting go" with "giving up." While acceptance of a lack of control is essential to coping with the disease within the family system, there is nothing passive about supporting a partner or child in their journey to recovery. This concept is the foundation of Van Vechten's original approach to empower individuals with knowledge, which when coupled with acceptance allows any family dealing with active addiction to make thoughtful and reasoned decisions to facilitate the recovery of both their loved ones and themselves.

Get better insights from time-series data and become proficient in model performance analysis Key Features Explore popular and modern machine learning methods including the latest online and deep learning algorithms Learn to increase the accuracy of your predictions by matching the right model with the right problem Master time series via real-world case studies on operations management, digital marketing, finance, and healthcare Book Description The Python time-series ecosystem is huge and often quite hard to get a good grasp on, especially for time-series since there are so many new libraries and new models. This book aims to deepen your understanding of time series by providing a comprehensive overview of popular Python time-series packages and help you build better predictive systems. Machine Learning for

Time-Series with Python starts by re-introducing the basics of time series and then builds your understanding of traditional autoregressive models as well as modern non-parametric models. By observing practical examples and the theory behind them, you will become confident with loading time-series datasets from any source, deep learning models like recurrent neural networks and causal convolutional network models, and gradient boosting with feature engineering. This book will also guide you in matching the right model to the right problem by explaining the theory behind several useful models. You'll also have a look at real-world case studies covering weather, traffic, biking, and stock market data. By the end of this book, you should feel at home with effectively analyzing and applying machine learning methods to time-series. What you will learn Understand the main classes of time series and learn how to detect outliers and patterns Choose the right method to solve time-series problems Characterize seasonal and correlation patterns through autocorrelation and statistical techniques Get to grips with time-series data visualization Understand classical time-series models like ARMA and ARIMA Implement deep learning models, like Gaussian processes, transformers, and state-of-the-art machine learning models Become familiar with many libraries like Prophet, XGboost, and TensorFlow Who this book is for This book is ideal for data analysts, data scientists, and Python developers who want instantly useful and practical recipes to implement today, and a comprehensive reference book for tomorrow. Basic knowledge of the Python Programming language is a must, while familiarity with statistics will help you get the most out of this book.

Clients who have multiple

addictions and disorders are more difficult to engage and treat than clients with a single disorder. Many of the current systems are ill-equipped to address the myriad challenges of these clients—their relapse and recidivism rates are higher, and many of these clients tend to slip through the cracks, often going back and forth among addictions treatment, psychiatric and medical hospitalizations, and incarceration. Too many difficult-to-reach clients are at risk for relapse because their practitioners lack effective, innovative strategies for this unique client base who remain part of a revolving-door syndrome. Now, Certified Alcohol and Drug Addictions Counselor Mark Sanders, LCSW, offers specific strategies to assist therapists and counselors who work with difficult and at-risk populations, including those with: multiple addictions co-occurring disorders adolescents; rural methamphetamine users antisocial personality disorder, criminality, and addiction trauma or grief and chemical dependency history of chronic relapse and recidivism Slipping Through the Cracks is a encyclopedic handbook to specific traits of the difficult-to-reach client, as well as a concise guidebook to effective strategies that will be useful to anyone working with clients in private practice or in treatment programs who have both mental health and substance abuse issues.
