The facts and findings presented in this guide confirm that employment in tourism and the economic value of tourism in terms of employment remain inadequately measured and insufficiently studied. Employment in the tourism industries needs to be measured and described in a more consistent way supported by proper statistical instruments developed on international tools and enhanced through international cooperation. This guide provides some examples of best practices of measuring employment in the tourism industries from countries that have demonstrated capacity to develop a comprehensive set of employment indicators. This publication is a joint project by the International Labour Organization (ILO) and UNWTO.

An Introduction to the Industry Varna University of Management

The New York Times Bestselling guide for managers and executives. Introducing the new, realistic loyalty pact between employer and employee. The employer-employee relationship is broken, and managers face a seemingly impossible dilemma: the old model of guaranteed long-term employment no longer works in a business environment defined by continuous change, but neither does a system in which every employee acts like a free agent. The solution? Stop thinking of employees as either family or as free agents. Think of them instead as allies. As a manager you want your employees to help transform the company for the future. And your employees want the company to help transform their careers for the long term. But this win-win scenario will happen only if both sides trust each other enough to commit to mutual investment and mutual benefit. Sadly, trust in the business world is hovering at an all-time low. We can rebuild that lost trust with straight talk that recognizes the realities of the modern economy. So, paradoxically, the alliance begins with managers acknowledging that great employees might leave the company, and with employees being honest about their own career aspirations. By putting this new alliance at the heart of your talent management strategy, you'll not only bring back trust, you'll be able to recruit and retain the entrepreneurial individuals you need to adapt to a fast-changing world. These individuals, flexible, creative, and with a bias toward action, thrive when they're on a specific "tour of duty"—when they have a mission that's mutually beneficial to employee and company that can be completed in a realistic period of time. Coauthored by the founder of LinkedIn, this bold but practical guide for managers and executives will give you the tools you need to recruit, manage, and retain the kind of employees who will make your company thrive in today's world of constant innovation and fast-paced change.

A debut collection of short fiction blends elements of Indian traditions with the complexities of American culture in such tales as "A Temporary Matter," in which a young Indian-American couple confronts their grief over the loss of a child, while their Boston neighborhood copes with a nightly blackout. Original. 20,000 first printing.

Measuring Employment in the Tourism Industries University of Chicago Press

Viewed through a politico-economic lens, Nordic countries share what is often referred to as the 'Nordic model', characterised by a comprehensive welfare state; higher spending on childcare; more equitable income distribution; and lifelong-learning policies. This edited collection considers these contexts to explore the complex nature of tourism employment, thereby providing insights into the dynamic nature, characteristics, and meaning of work in tourism. Contributors combine explorations of the impact of policy on tourism employment with a more traditional human resources management approach focusing on employment issues from an organizational perspective, such as job satisfaction, training, and retention. The text points to opportunities as well as challenges relating to issues such as the notion of 'decent work', the role and contribution of migrant workers, and more broadly, the varying policy objectives embedded within the Nordic welfare model. Offering a detailed, multi-faceted analysis of tourism employment, this book is a valuable resource for students, researchers and practitioners interested in tourism employment in the region.

This book is the first to systematically introduce China's tourism education system and the various tourism education practices in China to the international audience and stakeholders. China has the world's largest tourism education system, which consists of over 1,000 higher learning institutions with tourism-related programs and over half a million of tertiary-level students studying in these programs. Despite the industry scale, internationally, little is known about this tourism education system and how it operates. Knowledge and better understanding of China's tourism education system are important as tourism becomes one of the critical forces transforming economy, society and environment. The book offers an historical evaluation of China tourism education development and elaborates on the current industry status and practices in different subject fields of China's tourism education, including tourism management, hospitality management, events and festival management in higher education, tourism vocational education, tour guides training and certification, master of tourism administration (MTA) education as a unique education model in China, PhD education in tourism, tourism curriculum, research and international collaboration in tourism education in China. The book provides relevant knowledge to international tourism education providers, industry practitioners, human resource managers, government officials, and tourism academics, researchers, and students.
