The first, and only, inside story of one of the greatest bands in rock history—Dire Straits—as told by founder member and bassist John Illsley. One of the most successful music acts of all time, Dire Straits filled stadiums around the world. Their album sold hundreds of millions of copies and their music—classics like “ Sultans of Swing, ” “ Romeo and Juliet, ” “ Money for Nothing, ” and “ Brothers in Arms ” —is still played on every continent today. There was, quite simply, no bigger band on the planet throughout the eighties. In this powerful and entertaining memoir, founding member John Illsley gives the inside track on the most successful rock band of their time. From playing gigs in the spit-and-sawdust pubs of south London, to hanging out with Bob Dylan in LA, Illsley tells the story of the band with searching honesty, soulful reflection, and wry humor. Starting with his own unlikely beginnings in Middle England, he recounts the band ’ s rise from humble origins to the best-known venues in

the world, the working man ' s clubs to Madison Square Garden, sharing gigs with wild punk bands to rocking the Live Aid stage at Wembley. And woven throughout is an intimate portrait and tribute to his great friend Mark Knopfler, the band's lead singer, songwriter, and remarkable guitarist. Tracing an idea that created a phenomenal musical legacy, an extraordinary journey of joy and pain, companionship and surprises, this is John Illsley ' s life in Dire Straits.

Motoring the Future Brooklands Book Limited

The future of politics after the pandemic COVID-19 exposed the pre-existing

conditions of the current global crisis. Many Western states failed to protect their populations, while others were able to suppress the virus only with sweeping social restrictions. In contrast, many Asian countries were able to make much more precise interventions. Everywhere, lockdown transformed everyday life, introducing an epidemiological view of society based on sensing, modeling, and filtering. What lessons are to be learned? The Revenge of the Real envisions a new positive biopolitics that recognizes that governance is literally a matter of life and death. We are grappling with multiple interconnected dilemmas—climate change, pandemics, the tensions between the individual and society—all of which have to be addressed on a planetary scale. Even when separated, we are still enmeshed. Can the world govern itself differently? What models and philosophies are needed? Bratton argues that instead of thinking of biotechnologies as something imposed on society, we must see them as essential to a politics of infrastructure, knowledge, and direct intervention. In this way, we can build a society based on a new rationality of inclusion, care, and prevention. Bosch Technical Instruction Bentley Publishers
