The European Union is the world's most advanced international organization, presiding over a level of legal and economic integration unmatched in global politics. To explain this achievement, many observers point to its formal rules that entail strong obligations and delegate substantial power to supranational actors such as the European Commission. This legalistic view, Mareike Kleine contends, is misleading. More often than not, governments and bureaucrats informally depart from the formal rules and thereby contradict their very purpose. Behind the EU's front of formal rules lies a thick network of informal governance

practices. If not the EU's rules, what accounts for the high level of economic integration among its members? How does the EU really work? In answering these questions, Kleine proposes a new way of thinking about international organizations. Informal governance affords governments the flexibility to resolve conflicts that adherence to EU rules may generate at the domestic level. By dispersing the costs that integration may impose on individual groups, it allows governments to keep domestic interests aligned in favor of European integration. The combination of formal rules and informal governance therefore sustains a level of cooperation that neither regime alone permits, and it reduces the EU's democratic deficit by including those interests into deliberations that are most immediately affected by its decisions. In illustrating informal norms and testing how they work, Kleine provides the first systematic analysis, based on new material from national and European archives and other primary data, of the parallel development of the formal rules and informal norms that have governed the EU from the 1958 Treaty of Rome until today.

Electronic Inspection Copy available for instructors here With the growth of work based learning and practitioner research this book leads the way by addressing key issues faced by 'insider-researchers' - learners, practitioners and managers doing research projects in the organizations and communities in which they themselves work, or where they are already familiar with the setting. The authors explore the implications of these research contexts, and discuss approaches and methodologies that work based researchers might adopt, with a particular focus on ethics - one of the

key concerns for those undertaking a research project of this type. This book is an authoritative and readable guide to the theory and practice of work based research. It is for anyone undertaking a research project based on work practice, including learners on postgraduate, undergraduate and doctoral programmes.

Practitioners, managers and participants in work based courses or modules in education, healthcare and business management, will find it particularly useful.

'Filling an enormous gap in the geographic literature, here is a terrific book that shows us how to think about and practice human geographic research' - Professor Jennifer Wolch, University of Southern California 'Practising Human Geography lucidly, comprehensively, and sometimes passionately shows why methodology matters, and why it is often so hard. To choose a method is to choose the kind of geographical values one wants to uphold. You need to get it right. These authors do' - Trevor Barnes, University of British Columbia 'Practising Human Geography is a godsend for students. Written in an accessible and engaging style, the book

demystifies the study of geographical methodology, offering a wealth of practical advice from the authors' own research experience. This is not a manual of approved geographical techniques. It is a reflexive, critical and highly personal account, combining historical depth with up-to-the-minute examples of research in practice. Practising Human Geography is a comprehensive and theoretically informed introduction to the practices of fieldwork, data collection, interpretation and writing, enabling students to make sense of their own data and to develop a critical perspective on the existing literature. The book makes complicated ideas approachable through the effective use of case studies and a firm grasp of contemporary debates' - Peter Jackson, Professor of Human Geography, University of Sheffield 'Practising Human Geography is a critical introduction to key issues in the practice of human geography, informed by the question 'how do geographers do research?' In examining those methods and practices that are essential to doing geography, the text presents a theoretically-informed discussion of the construction and interpretation of geographical data - including: the use of core research methodologies; using official and non-official sources; and the interpretative role of the researcher. Framed by an overview of how ideas of practising human geography have changed, the twelve chapters offer a comprehensive and integrated overview of research methodologies. The text is illustrated throughout with text boxes, case studies, and definitions of key terms.

Practising Human Geography will introduce geographers - from undergraduate to faculty - to the core issues that inform research design and practice.

'Every now and then one stumbles across a breath of fresh air and this practical research guide is certainly one of them!... It will be no doubt refreshing for those of us who keep going to the field and who perhaps have forgotten the human dimension of research. For those who supervise students the book will be a useful source of inspiration.... I shall certainly recommend the book to any of my students' -

Development and Change

'Development Fieldwork is an excellent examination of and preparation for development research and will be an invaluable guide to all those entering or considering fieldwork, wherever that may be' - Progress in Development Studies 'I would strongly recommend it as a field textbook across a range of disciplines and topics. The tone is thoughtful, engaging and pragmatic, with all of the chapters contributing equally to a very high quality publication. It is the best book I have read on fieldwork for a while. It is essential for anyone contemplating 'development'

based study, but it also contains a great deal of value and interest to geographers, sociologists and other students working in and on the West' - Singapore Journal of Tropical Geography 'This is an outstanding book, and one that all of us engaged in fieldwork in "developing countries" will want to read and doubtless re-read. Thoughtful, relevant and consistently well-written' - Professor Stuart Corbridge, London School of Economics and University of Miami 'An excellent overview of the pitfalls and problems of fieldwork in remote places... elegant and enjoyable, incisive and elegant... good humoured and eminently practical - the "Lonely Planet" guide to the field' - Professor John Connell, Sydney University 'A very welcome and richly inviting review of the politics, ethics and practicalities of fieldwork, Development Fieldwork deserves reading in many 'fields'. This will surely travel far' - James D Sidaway, National University of Singapore 'I warmly commend this guide to anyone planning or even thinking about fieldwork in the Third World. Postgraduates and academics will find it particularly good, as it not only raises an abundance of practical and logistical

points but explores fundamental ethical and epistemological concerns to an unusual degree, including issues not addressed elsewhere. The clarity and attention to detail are also very welcome, as is the ease with which the book can be navigated' - Janet Townsend, University of Durham

'Developmental Fieldwork' provides a useful guide packed with information on practical and personal (and sometimes political) matters. As with all good 'rough' guides, rather than fixing options and closing issues, the authors make it a point to suggest flexible itineraries across the terrain of the 'field'. The book should in time become a well-thumbed, dog-eared volume, thrown into the haversack along with the notebook (both sorts), tape recorder, mosquito repellent, sunglasses and sturdy shoes' - Brenda S A Yeoh, National University of Singapore

'A good introductory text that will assist the novice development researcher to prepare for a new experience and will also provide a timely reminder for more experienced researchers' - Evaluation Journal of Australasia

Development Fieldwork provides an indispensable new resource and guide for all students undertaking development fieldwork in the Third World. Accessible and lively, the text: - introduces the basics of research design and methodology together with guidance on choosing the best research methods; - provides 'hands on' advice (practical, personal and ethical) to those preparing to enter 'the field'; - covers the initial planning and preparation stages to end writing up and tips for the successful resumption of life back home. The authors draw upon a rich and diverse set of fieldwork experiences across the developing world (rural and urban) and utilize case studies to illustrate the many common issues and challenges that will face both new and experienced fieldwork researchers. It will be an essential text and companion to all postgraduate and research students across the social sciences.

In this age of information overload, people use a variety of strategies to make choices about what to buy, how to spend their leisure time, and even whom to date. Recommender systems automate some of these strategies with the goal of providing affordable, personal, and high-quality recommendations. This book offers an overview of approaches to developing state-of-the-art recommender systems. The authors present current algorithmic approaches for generating personalized buying

proposals, such as collaborative and content-based filtering, as well as more interactive and knowledge-based approaches. They also discuss how to measure the effectiveness of recommender systems and illustrate the methods with practical case studies. The final chapters cover emerging topics such as recommender systems in the social web and consumer buying behavior theory. Suitable for computer science researchers and students interested in getting an overview of the field, this book will also be useful for professionals looking for the right technology to build real-world recommender systems.

Nearly half a century has passed since Hymes proposed the concept of communicative competence to describe the knowledge and skills required for the appropriate use of language in a social context. During these decades, a number of scholars have applied and refined this concept. In language education, communicative competence has been identified as a major objective of learning. This book will inform readers about communicative competence as a highly complex construct encompassing an array of sub-competencies such as linguistic skills and proficiencies, knowledge of socio-cultural and socio-pragmatic codes, and the ability to engage in textual

and conversational discourse. Findings from research in related disciplines have pointed to the significance of factors that can contribute to the attainment of communicative competence. Various teaching practices and relevant Information and Communication Technology (ICT) tools will be also introduced and discussed to achieve communicative competence as a complex ability. It is a timely contribution to current research on key areas in the teaching, learning and acquisition of second/foreign languages.
