Global Transformations in  
Tourist Destinations Edward  
Elgar Publishing

There is an increasing interest in inclusive wealth, and inclusive wealth can be a solution to the problematic narrowness of the traditional national accounting system, which has been recognized for a long time. This book offers a comprehensive guide on this subject of inclusive wealth.

**Tourism, Public Transport  
and Sustainable Mobility**

The Routledge Companion to  
Media and Tourism

How do hosts and guests welcome each other in responsible encounters? This book addresses the question in a longitudinal ethnographic study on tourism development in the coffee- cultivating communities in Nicaragua. The research follows the trail of development practitioners and researchers who travel with a desire to help, teach and study the local hosts. On a broader level, it is a journey

exploring how the conditions of hospitality become negotiated between these actors. The theoretical approach bases itself on the ethical subjectivity as responsibility and receptivity towards 'the other'. The ideas put forward in the book suggest that hospitality, responsibility and participation all require a readiness to interrupt one's own ways of doing, knowing and being. This book provides a conceptual tool to facilitate reflection on alternative ways of doing togetherness and will be of interest to students and researchers of hospitality, tourism, development studies, cultural studies and anthropology.

From Theory to Practice  
Routledge

Multispecies Leisure:  
Human-Animal Interactions  
in Leisure Landscapes seeks to 'bring the animal in' to the leisure studies domain and contribute to greater understanding of leisure as a

---

complex, interwoven multispecies phenomenon. The emerging multidisciplinary field of human-animal studies encourages researchers to move beyond narrow focus on human-centric practices and ways of being in the world, and to recognise that human and non-human beings are positioned within shared ecological, social, cultural and political spaces. With some exceptions, leisure studies has been slow to embrace the ‘ animal turn ’ and consider how leisure actions, experiences and landscapes are shaped through multispecies encounters between humans, other animals, birds and insects, plants and environment. This book begins to address this gap by presenting research that considers leisure as more-

than-human experiences. The authors consider leisure with nonhuman others (e.g. dogs, horses), affecting those others (e.g. environmental concerns) and affected by the non-human (e.g. landscape, weather), by exploring the ‘ contact zones ’ between humans and other species. Thus, this work contributes to greater understanding of leisure as a complex, multispecies phenomenon. The chapters in this book were originally published as a Special Issue of the Leisure Studies.

**A Study of the Delivery and Uptake of the Sustainable Tourism Message in a Sample of Small Rural Tourism Businesses in North Yorkshire**  
Routledge

This is the first handbook to provide a comprehensive coverage of the main approaches that theorize translation and globalization, offering a wide-ranging selection of chapters

---

dealing with substantive areas of research. The handbook investigates the many ways in which translation both enables globalization and is inevitably transformed by it. Taking a genuinely interdisciplinary approach, the authors are leading researchers drawn from the social sciences, as well as from translation studies. The chapters cover major areas of current interdisciplinary interest, including climate change, migration, borders, democracy and human rights, as well as key topics in the discipline of translation studies. This handbook also highlights the increasing significance of translation in the most pressing social, economic and political issues of our time, while accounting for the new technologies and practices that are currently deployed to cope with growing translation demands. With five sections covering key concepts, people, culture, economics and politics, and a substantial introduction and conclusion, this handbook is an indispensable resource for

students and researchers of translation and globalization within translation and interpreting studies, comparative literature, sociology, global studies, cultural studies and related areas.

### **Multispecies Leisure: Human-Animal Interactions in Leisure Landscapes** Emerald Group Publishing

As identity and authenticity discourses increasingly saturate everyday life, so too have these concepts spread across the humanities and social sciences literatures. Many scholars may be interested in identity and authenticity but lack knowledge of paradigmatic or disciplinary approaches to these concepts. This volume offers readers insight into social constructionist

---

approaches to identity and authenticity. It focuses on the processes of identification and authentication, rather than on subjective experiences of selfhood. There are no attempts to settle what authentic identities are. On the contrary, contributors demonstrate that neither identities nor their authenticity have a single or fixed meaning. Chapters provide exemplars of contemporary research on identity and authenticity, with significant diversity among them in terms of the identities, cultural milieu, geographic settings, disciplinary traditions, and methodological approaches considered. Contributors introduce readers to a number of established and emerging identity groups from sites around the world, from yogis and punks to fire dancers and social media influencers. Their conceptual work stretches from the micro-analytic to the ethno-national as authors employ a variety of qualitative methods including ethnographic fieldwork, interviewing, and the collection and analysis of naturally-occurring interactions. Several of the chapters look directly at identification and authentication while others focus on the social and cultural

---

backdrops that structure these practices – what unites them is the adoption of social constructionist sensibilities. This book will appeal to anyone interested in understanding identity and authenticity.

This book contains the proceedings of the seventh in a series of biennial conferences on the topic of sustainable regional development that began in 2003. Organised by the Wessex Institute, the conference series provides a common forum for all scientists specialising in the range of subjects included within sustainable development and planning. In order to ensure that planning and development can meet our present needs without

compromising future generations, planners, environmentalists, architects, engineers, policy makers, and economists must work together. The use of modern technologies in planning gives us new potential to monitor and prevent environmental degradation. In recent years, in many countries an increase in spatial problems has led to planning crises. Planning problems are often associated with uneven development, deterioration of the quality of urban life, and destruction of the environment. The increasing urbanisation of the world, coupled with the global issues of environmental pollution, resource shortage, and economic restructuring, demand that we ensure a decent quality of life for our cities. Other environments, such as rural areas, forests, coastal regions, and mountains,

---

face their own problems that urgently require solutions in order to avoid irreversible damage. Effective strategies for management should consider planning and regional development, two closely related disciplines, and emphasise the demand to handle these matters in an integrated way. The papers in the book cover such topics as: Regional Planning; City Planning; Sustainability and the Built Environment; Cultural Heritage; Environmental Management; Environmental Policies and Planning; Sustainable Tourism; Resources Management; Social and Political Issues; Rural Developments; Sustainable Solutions in Emerging Countries; Transportation; Energy Resources; Environmental Economics; Sustainable Assessment; Sustainable Development Indicators; Sustainability Modelling; Governance;

Resilience; Community Planning; Planning for Equality; Quality of Life. Edward Elgar Publishing Offers an insight into how volunteer tourism is growing and developing. This title includes case studies from researchers in the field which explore the experiences of the volunteer tourist and the relationships between volunteers and host communities and commercial, non-commercial and government entities involved in volunteer tourism. Proceedings of the 2nd International Conference: Quantitative and Qualitative Methodologies in the Economic and Administrative Sciences Varna University of Management The book is a landmark volume which examines perplexing tourism debates such as the relevance of mass tourism, climate

---

change, authenticity, tourism and poverty and slow tourism. Multidisciplinary in content, it covers applied aspects of sociology, anthropology, humanities and biosciences. The book is unique in its presentation and style and will be an essential resource for scholars, academics and practitioners. The Routledge Companion to Media and Tourism Routledge NAPA Bulletin is a peer reviewed occasional publication of the National Association for the Practice of Anthropology, dedicated to the practical problem-solving and policy applications of anthropological knowledge and methods. peer reviewed publication of the National Association for the Practice of

Anthropology dedicated to the practical problem-solving and policy applications of anthropological knowledge and methods most editions available for course adoption Handbook of Teaching and Learning in Tourism WIT Press

This unique book examines the vital and contested connections between colonialism and tourism, which are as lively and charged today as ever before. Demonstrating how much of the marketing of these destinations represents the constant renewal of colonialism in the tourism business, this book illustrates how actors in the worldwide tourism industry continue to benefit from the colonial roots of globalisation. Research Themes for Tourism Routledge This book is a printed edition of the Special Issue

---

"Sustainable Consumer Behavior" that was published in Sustainability Linking Theory and Practice Routledge Since the middle of the last century tourism has demonstrated almost continual growth, with international tourist arrivals now recorded in excess of one billion per annum. Given the global socio-economic significance of tourism, it is imperative to develop educational opportunities for those working in tourism-related industries. These opportunities should fulfil the changing needs of both industry, travellers, and the learners themselves. While the concept of lifelong

learning in the tourism industry plays an important role, it has received little academic attention to date. This book provides a theoretical overview of lifelong learning for tourism, exploring its history, practice, and conceptualization. It demonstrates the importance of lifelong learning for tourism from a variety of perspectives, drawing on educational, industry, policy, and socio-economic insights. The book explores managerial and political implications, critical issues, best practice examples, and draws on a range of international case studies to demonstrate theory in

---

practice. Finally, it offers a conceptual framework for future curriculum approaches. This book will be of interest to students, scholars, and practitioners of tourism studies, hospitality, business and management, and international development. It will also appeal to those interested in adult education, vocational training, professional development, and pedagogy.

Study Abroad and the Quest for an Anti-Tourism Experience John Wiley & Sons

The Routledge Handbook of Tourism Cities presents an up-to-date, critical and comprehensive overview of established and emerging themes in urban

tourism and tourist cities. Offering socio-cultural perspectives and multidisciplinary insights from leading scholars, the book explores contemporary issues, challenges and trends. Organised into four parts, the handbook begins with an introductory section that explores contemporary issues, challenges and trends that tourism cities face today. A range of topics are explored, including sustainable urban tourism, overtourism and urbanisation, the impact of terrorism, visitor – host interactions, as well as reflections on present and future challenges for tourism cities. In Part II the marketing, branding and markets for tourism cities are considered, exploring topics such as destination marketing and branding, business travellers and exhibition hosting. This section combines academic scholarship with real-life

---

practice and case studies from cities. Part III discusses product and technology developments for tourism cities, examining their supply and impact on different travellers, from open-air markets to creative waterfronts, from social media to smart cities. The final Part offers examples of how urban tourism is developing in different parts of the world and how worldwide tourism cities are adapting to the challenges ahead. It also explores emerging forms of specialist tourism, including geology and ecology-based tourism, socialist heritage and post-communist destination tourism. This handbook fills a notable gap by offering a critical and detailed understanding of the diverse elements of the tourist experience today. It contains useful suggestions for practitioners, as well as examples for theoretical frameworks to students in

the fields of urban tourism and tourism cities. The handbook will be of interest to scholars and students working in urban tourism, heritage studies, human geography, urban studies and urban planning, sociology, psychology and business studies.

*Sustainable Transport and Tourism Destinations*  
Routledge

This book critically explores the interconnections between tourism and the contemporary city from a policy-oriented standpoint, combining tourism perspectives with discussion of urban models, issues, and challenges. Research-based analyses addressing managerial issues and evaluating policy implications are described, and a comprehensive set of case studies is presented to demonstrate practices and policies in various urban contexts. A key

---

message is that tourism policies should be conceived as integrated urban policies that promote tourism performance as a means of fostering urban quality and the well-being of local communities, e.g., in terms of quality spaces, employment, accessibility, innovation, and learning opportunities. In addition to highlighting the significance of urban tourism in relation to key urban challenges, the book reflects on the risks and tensions associated with its development, including the rise of anti-tourism movements as a reaction to touristification, cultural commodification, and gentrification. Attention is drawn to asymmetries in the costs and benefits of the city tourism phenomenon, and the supposedly unavoidable trade-off between the interests of residents and tourists is critically questioned.

## Routledge

This book provides a comprehensive, detailed and insight rich review of both the positive (capacity building, cultural conservation and economic opportunities) and negative (commodification, cultural change and possible loss of ownership and control) aspects of tourism development in indigenous communities. The relationship between tourism and indigenous people provides the ultimate test of sustainable tourism as a concept for tourism management and cultural conservation. The chapters range geographically from Central and North America, through Africa, and Asia to Australia. Issues covered include

---

governance and engagement, research, minority language issues, visitor codes of conduct, trail development, Indigenous product design, Indigenous urban festivals, Indigenous values and capitalism, gentrification, heritage interpretation, marketing, demand, world views and representation. This book was originally published as a special issue of the Journal of Sustainable Tourism.

### Connecting Tourist Experiences to Places

Christos Frangos  
With contributions from anthropologists and cultural theorists, *Study Abroad and the Quest for an Anti-Tourism Experience* examines the culture and cultural implications of student

travel. Drawing on rich case studies from the Arctic to Africa, Asia to the Americas, this impressive array of experts focuses on the challenges and ethical implications of student engagement, service and volunteering, immersion, research in the field, local community engagement, and crafting a new generation of active, engaged global citizens. This volume is a must-read for students, practitioners, and scholars.

### Towards an Integrative Agenda on Urban Tourism

John Wiley & Sons

The global phenomenon of political consumerism is known through such diverse manifestations as corporate boycotts,

---

increased preferences for organic and fairtrade products, and lifestyle choices such as veganism. It has also become an area of increasing research across a variety of disciplines. Political consumerism uses consumer power to change institutional or market practices that are found ethically, environmentally, or politically objectionable. Through such actions, the goods offered on the consumer market are problematized and politicized. Distinctions between consumers and citizens and between the economy and politics collapse. The Oxford Handbook of Political Consumerism offers the first comprehensive theoretical and comparative overview of the ways in which the market becomes a political arena. It maps the four major forms of political consumerism: boycotting, buycotting (spending to show support), lifestyle politics, and discursive actions, such as culture jamming. Chapters by leading scholars examine political consumerism in different locations and industry sectors, and in consideration of environmental and human rights problems, political events, and the ethics of production and manufacturing practices. This volume offers a thorough exploration of the phenomenon and its myriad dilemmas, involving religion, race, nationalism, gender relations, animals, and our common future. Moreover, the Handbook takes stock of political consumerism's effectiveness in solving complex global problems and its use to both promote and impede democracy.

Corporate Social Responsibility for Sustainable Tourism

---

Routledge

This book explores the ways and means by which English threatens the vitality and diversity of other languages and cultures in the modern world. Using the metaphor of the Hydra monster from ancient Greek mythology, it explores the use and misuse of English in a wide range of contexts, revealing how the dominance of English is being confronted and counteracted around the globe. The authors explore the language policy challenges for governments and education systems at all levels, and show how changing the role of English can lead to greater success in education for a larger proportion of children. Through personal

accounts, poems, essays and case studies, the book calls for greater efforts to ensure the maintenance of the world's linguistic and cultural diversity.

The Wealth of Nations and Regions Emerald Group Publishing

This significant volume is the first to use primary research evidence to examine tourism, ageing and the implications of an ageing population for the visitor economy.

Adopting a multidisciplinary approach, this book offers insights into the new opportunities, threats and challenges that the growing ageing-tourism markets poses. The ageing population has created a

---

demographic time bomb with a population structure that is skewed towards a growing proportion of older people. When this is combined with the impact of health conditions, such as dementia, the future shape of visitor demand and tourism behaviour is likely to change and face many new challenges, albeit at different rates in time and space. Chapters include cutting-edge insights into future issues, while interviews are used to illustrate and explain issues affecting ageing and tourism, creating a much-needed synthesis of the ageing – tourism nexus to demonstrate intellectual leadership around this theme. This book will be of great interest to all upper-level students, academics and researchers in the fields of tourism, hospitality, leisure studies, and health and social care.

Why English? Routledge

Tourism marketing has typically been seen as exploitative and fuelling hedonistic consumerism. Sustainability marketing can, however, use marketing skills and techniques to good purpose, by understanding market needs, designing more sustainable products and identifying more persuasive methods of communication to bring behavioural change. This book summarises the latest research on the theories, methods and results of marketing that seeks to make tourist destinations

---

better places to live in, and better places to visit. It shares evidence on the motivations, mechanisms and barriers that businesses encounter, and on successes in changing consumer behaviour and pursuing sustainability goals. Particular attention is given to the methodologies of sustainable tourism marketing, to the subject 's breadth and complexity, and to its many innovations. Further research is called for to fully understand what contextual aspects influence these pro-sustainability interventions to achieve which outcomes in other settings, in order to validate some of the exploratory studies discussed, and establish the feasibility of scaling up pilot studies for more general use. This book was originally published as a special issue of the Journal of Sustainable Tourism.
