hospitals. This

second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that

support the Integrated Management. Power and Peril Mercer University Press Killing the Model Minority Stereotype comprehensively explores the complex permutations of the Asian model minority myth, exposing the ways in which stereotypes of Asian/Americans operate in the service of racism. Chapters include counter-narratives, critical analyses, and transnational perspectives. This volume connects to overarching projects of decolonization, which social justice educators and

practitioners will find useful for understanding how the model minority myth functions to uphold white supremacy and how complicity has a damaging impact in its perpetuation. The book adds a timely contribution to the model minority discourse. “ The contributors to this book demonstrate that the insidious model minority stereotype is alive and well. At the same time, the chapters carefully and powerfully examine ways to deconstruct and speak back to these misconceptions of Asian Americans. Hartlep and Porfilio pull together an

important volume for anyone interested in how racial and ethnic stereotypes play out in the lives of people of color across various contexts. ” - Vichet Chhuon, University of Minnesota Twin Cities “ This volume presents valuable additions to the model minority literature exploring challenging stereotypes in a wide range of settings and providing helpful considerations for research and practice. ” - David W. Chih, University of Illinois at Urbana-Champaign “ Asian Pacific Islander adolescents and young adults are

especially impacted by the model minority stereotype, and this volume details the real-life consequences for them and for all communities of color. The contributors provide a wide-ranging critique and deconstruction of the stereotype by uncovering many of its manifestations, and they also take the additional step of outlining clear strategies to undo the stereotype and prevent its deleterious effects on API youth. Killing the Model Minority Stereotype: Asian American Counterstories and Complicity is an essential read for

human service professionals, educators, therapists, and all allies of communities of color. ” - Joseph R. Mills, LICSW, Asian Counseling and Referral Service, Seattle WA

I was known as the traitor's daughter. When I was five years old, my father was tortured, branded with the letter 'Z', then beaten and left for dead. The grueling punishment for his crime was a reminder to all others who dared threaten the Russian's reign. I was the young girl left behind. A living piece of the traitorous puzzle the Russian leader tried so

diligently to ignore. Until I grew up. No longer could he deny how much my existence had always been intertwined with his. And in order to survive the life I was thrown into, I was forced to learn my place inside of it. Vlad Zalesky was a tyrant to the lost. I hated him. He was a terror of mass destruction. I was afraid of him. He was a tormentor of the weak. But not far beneath the venomous man's outward indifference was something else. Vlad Zalesky carried secrets of unrestrained burden. I wanted to know those secrets. And because of my decisions, someone in our family had to pay. Peril in the Ponds Brookings Institution Press

Who Speaks for the Oceans? The question has been asked a lot in recent years - just who is looking out for our oceans? Covering over seventy percent of the earth's surface it is the world's largest common property resource, jointly owned by over six billion humans. It is the foundation for life on earth as we know it. Over the years, many people have spoken about various aspects of our ocean environments and they have spoken to different audiences in many different ways. For many in the public realm,

Jacques Cousteau spoke for the ocean. Since his passing, no single voice with the sallye public identity or recognition has emerged. Certainly the many governments bordering our oceans cannot agree on common principles or issues of ocean use and management. We might be tempted think that we do not have an ocean spokesperson or champion, but we would be wrong. Today, the rapidly growing number of scientists working hard to expand our understanding of our ocean realm are

the ocean voices we should listen to. At the same time as our scientists advance their understanding of the oceans, we all need to advance our abilities and commitment to communicate on behalf of the oceans with broader and broader audiences who need to be aware of where things stand. Often called "the last great frontier", earth's oceans are vast, widely varied, and are hard to get to, arid into, to do the research we need done.

The Polar North is known to be home to large gas and oil reserves and its positionholds significant trading and military advantages, yet the maritime boundaries of the region remain ill-defined. In the twenty-first century the Arctic is undergoing profound change. As the sea ice melts, a result of accelerating climate change, global governance has become vital. In this first of three volumes, the latest research and analysis from the Fridtjof Nansen

Institute, the world's leading Arctic research body, is brought together. Arctic Governance: Law and Politics investigates the legal and political order of the Polar North, focusing on governance structures and the Law of the Sea. Are the current mechanisms at work effective? Are the Arctic states' interests really clashing, or is the atmosphere of a more cooperative nature? Skilfully delineating policy in the region and analysing the consequences of treaty agreements, Arctic

Governance's uncovering of a rather orderly 'Arctic race' will become an indispensable contribution to contemporary International Relations concerning the Polar North. Collier's RTI Press This volume follows eleven Black male teachers from an urban, predominantly Black school district to reveal a complex set of identity politics and power dynamics that complicate these teachers' relationships with students and fellow educators. It provides new and important insights

into what it means to be a Black male teacher and suggests strategies for school districts, teacher preparation programs, researchers and other stakeholders to rethink why and how we recruit and train Black male teachers for urban K-12 classrooms. Bulletin of the Atomic Scientists World Health Organization Incapacitating Biochemical Weapons examines the promise and peril behind weapons based on natural or synthetic biochemical compounds that are meant to cause rapid incapacitation but not to kill. An agent

has yet to be found that can effectively incapacitate people without risk of death when used in a real-world military or law enforcement situation. But revolutionary advances in the life sciences and biotechnology are generating new knowledge and potentially greater capabilities for manipulating human consciousness, emotions, mental functions, and behavior. These advances, coupled with the changing nature of conflict and warfare in the 21st century, are generating renewed government interest in incapacitating biochemical

weapons. Governments, international organizations, and society as a whole have critical decisions to make about whether and how to pursue the development, or conversely the effective prohibition, of incapacitating biochemical weapons. This book provides a comprehensive survey of the scientific, military, humanitarian, legal, and political issues associated with the development and use of incapacitating biochemical weapons. The expert contributing authors explore a wide range of issues pertinent to the topic from

science to history to current military interest, arms control, and international law. Incapacitating Biochemical Weapons: Promise or Peril? will be of interest to scientists, the military and law enforcement communities, policy-makers, and all who are concerned about the proliferation of such weapons. The Journal of Industrial Hygiene and Toxicology Springer Science & Business Media Are we environmentally victimizing, perhaps even poisoning, our minority and low-income citizens?

Proponents of "environmental justice" assert that environmental decisionmaking pays insufficient heed to the interests of those citizens, disproportionately burdens their neighborhoods with hazardous toxins, and perpetuates an insidious "environmental racism." In the first book-length critique of environmental justice advocacy, Christopher Foreman argues that it has cleared significant political hurdles but displays substantial limitations and

drawbacks. Activism has yielded a presidential executive order, management reforms at the Environmental Protection Agency, and numerous local political victories. Yet the environmental justice movement is structurally and ideologically unable to generate a focused policy agenda. The movement refuses to confront the need for environmental priorities and trade-offs, politically inconvenient facts about environmental

health risks, and the limits of an environmental approach to social justice. Ironically, environmental justice advocacy may also threaten the very constituencies it aspires to serve--distracting attention from the many significant health hazards challenging minority and disadvantaged populations. Foreman recommends specific institutional reforms intended to recast the national dialogue about the stakes of these populations in environmental

protection. Waters in Peril Walter de Gruyter GmbH & Co KG Return to the enthralling and always surprising world of Tyme, this time with a roguish frog prince and a secret plot, as Megan Morrison continues her acclaimed fantasy series. Syrah Huanui is a frog. He wasn't always one--once he was a Prince of the Olive Isles, a champion launchball player, a beloved favorite of all.Or so he thought! After accidentally (OK, intentionally) letting a love letter from the cloying Deli Gourd get published for everyone to read, his fed-up family kicks him out. And an unfortunate encounter with a Wishing Well

leaves him trapped in the body of a frog, with no hope of transforming back. A year later, Syrah finds himself in Yellow alongside who else: Deli. A sudden, deadly plague has started to run through the country, right before a crucial election for Governor. Syrah isn't sure he'll ever become himself again, or if anyone will ever realize that it's HIM in there, but he is sure he might be able to help stop whatever evil is going on...

“ This eloquent, elegant book thoughtfully plumbs

the . . . consequences of our dependence on plastics ” (The Boston Globe, A Best Nonfiction Book of 2011). From pacemakers to disposable bags, plastic built the modern world. But a century into our love affair, we ’ re starting to realize it ’ s not such a healthy relationship. As journalist Susan Freinkel points out in this eye-opening book, we ’ re at a crisis point. Plastics draw on dwindling fossil fuels, leach harmful chemicals, litter landscapes, and destroy marine life. We ’ re drowning in the stuff, and we need to start making some hard choices. Freinkel tells her

story through eight familiar plastic objects: a comb, a chair, a Frisbee, an IV bag, a disposable lighter, a grocery bag, a soda bottle, and a credit card. With a blend of lively anecdotes and analysis, she sifts through scientific studies and economic data, reporting from China and across the United States to assess the real impact of plastic on our lives. Her conclusion is severe, but not without hope. Plastic points the way toward a new creative partnership with the material we love, hate, and can't seem to live without. "When you write about something so

ubiquitous as plastic, you must be prepared to write in several modes, and Freinkel rises to this task. . . . She manages to render the most dull chemical reaction into vigorous, breathless sentences. " —SF Gate "Freinkel's smart, well-written analysis of this love-hate relationship is likely to make plastic lovers take pause, plastic haters reluctantly realize its value, and all of us understand the importance of individual action, political will, and technological innovation in weaning us off our addiction to synthetics. " —Publishers Weekly

"A compulsively interesting story. Buy it (with cash). " —Bill McKibben, author of *The End of Nature* "What a great read—rigorous, smart, inspiring, and as seductive as plastic itself. " —Karim Rashid, designer

Corinth: "Do you not know that you are the temple of God and that the spirit of God dwells among you?" The question is framed in the Greek language such that Paul expected an affirmative response (i.e. ' Yes, we know we are the temple of God '), and yet mapping such an idea onto a gathering of people is rather unprecedented in antiquity. By surveying relevant literary texts and material culture from the ancient Mediterranean (roughly 400 BCE—200 CE), the author shows how Paul appropriated the concept of temple in his exhortation to the

Corinthians. A few key texts in 1 Corinthians can be read as a cohesive and coherent set of passages that unpack the idea of the Corinthians as "the temple of God." While these passages are not typically read together, this study shows how themes such as power and spirit, traditions from Exodus, divine benefits, and sacrificial foods found in these passages reflect similar concerns observed in temples and other sanctuaries in ancient Greek, Roman, and Jewish contexts. Careful analysis of the religious experience of visitors to temples—an

important topic that remains largely ignored in secondary literature—gives greater clarity to the nuances of Paul ' s temple discourse. As the temple, the Corinthian community not only receives God's power and benefits, but also remains vulnerable to peril posed by insiders and outsiders. International Encyclopedia of Ergonomics and Human Factors, Second Edition - 3 Volume Set Scholastic Inc. The previous edition of the International Encyclopedia of Ergonomics and Human Factors made history as the first unified source of reliable information

drawn from many realms of science and technology and created specifically with ergonomics professionals in mind. It was also a winner of the Best Reference Award 2002 from the Engineering Libraries Division, American Society of Engineering Education, USA, and the Outstanding Academic Title 2002 from Choice Magazine. Not content to rest on his laurels, human factors and ergonomics expert Professor Waldemar Karwowski has overhauled his standard-setting resource, incorporating coverage of tried and true methods, fundamental principles, and major paradigm shifts in philosophy, thought, and design. Demonstrating the

truly interdisciplinary nature of this field, these changes make the second edition even more comprehensive, more informative, more, in a word, encyclopedic. Keeping the format popularized by the first edition, the new edition has been completely revised and updated. Divided into 13 sections and organized alphabetically within each section, the entries provide a clear and simple outline of the topics as well as precise and practical information. The book reviews applications, tools, and innovative concepts related to ergonomic research. Technical terms are defined (where possible) within entries as well as in a glossary. Students and professionals will find this format invaluable,

whether they have ergonomics, engineering, computing, or psychology backgrounds. Experts and researchers will also find it an excellent source of information on areas beyond the range of their direct interests. The Courage Factor CRC Press The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world. Bell & Howell Newspaper Index

to the Los Angeles Times "O'Reilly Media, Inc." Received document entitled: APPENDIX TO PETITION FOR WRIT California. Court of Appeal (4th Appellate District). Division 3. Records and Briefs Univ of Massachusetts Press This handbook provides practical, technological information on the toxicological aspects of dangerously hazardous chemicals, the design and maintenance of facilities for

processing them, as well as preventive and mitigative procedures for controlling their accidental release. Key areas of industrial toxicology, including major routes of occupational exposure, and general toxic properties of selected chemicals, are discussed.
