Andreas and the Ambiguity of Courtly Love Springer Science & Business Media

A resolution to the vexed problem whether a troubadour's love is erotic or spiritual is offered by Paolo Cherchi through a new reading of Andreas Capellanus' *De Amore* (written around 1186-1196). He suggests that Andreas, using a rhetorical strategy that creates ambiguity, condemns courtly love because its claim that passion generates virtue is untenable and deceitful. Although Andreas grasped the core of the courtly love 'system,' namely, the relation between passion and ethics, he failed to consider the notion of *mezura*, that courtly virtue through which troubadours transformed nature into culture, and erotic passion into social discourse. Cherchi offers an innovative interpretation and a close reading of selected poems. He traces the history of Provençal lyric poetry, highlighting some of the significant personalities and movements.

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei

Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst.

Although accounts of overlanding expeditions had been published previously, Browne points out in his Preface that a specific guide was still lacking: The object of this book is to give a true and graphic account of the trade of S2OverlandingS3 as carried out in the Australian colonies. The author has tried to set before the reader a fair sketch of the S2OverlanderS3 himself, his occupation, his difficulties, and the people he employs however small its merits, it may at any rate obtain some credit for novelty, as he believes it to be a subject as yet never touched upon. S3 Brownes book, a practical guide to herding cattle and sheep through rough terrain in Australia, is filled with valuable advice for adverse local conditions. Overlanding in Australia covers all aspects of the trade, from dingo attacks to the laws of branding and ownership of stock. The author discusses the use of dogs in controlling stock on the move, pastures in Australia, surviving drought and special

problems posed by crossing rivers and losing sheep in the bush. Of special interest is a discussion of (sometimes tense) relations between squatters and stockmen moving cattle across the landscape.
