The book deals with the fundamentals, theoretical

bases, and design methodologies of conventional internal combustion engine (ICE) vehicles, electric vehicles (EVs), hybrid electric vehicles (HEVs), and fuel cell vehicles (FCVs). The design methodology is described in mathematical terms, step-by-step, and the topics are approached from the overall drive train system, not just individual components. Furthermore, in explaining the design methodology of

each drive train, design examples are presented with simulation results.

It is an exciting historical tale

played out in the Caribbean on land and at sea. The story has obviously been researched very well and gives you a feeling of authenticity in the facts and places, the ports and the mixtures of peoples.
