Some engines have had the problem of the crankshaft pulley bolt coming loose. This will make a rattling noise as the engine idles. Our technicians tell us that the pulley bolt should have a thread locker applied and then re-torqued.

Toyota 4a Engine Cam Pulley Timing Mark

If the idler pulley fails, there will be a very audible chirping noise from the front of the engine. This is because the idler pulley bearing is no longer smooth. If it is not changed immediately, the engine will being running roughly, or stall completely, and internal engine damage may occur due to slippage or breakage of the timing belt.
