What is innovation? The
dictionary defines it as "renewal
through the use of new
processes and technologies." In
advertising, everything is an
innovation. But what is truly
innovative? Since 1930, the
Pininfarina design firm of
Turin, Italy, has been answering
that question. This is where the
Cistalia 202 was developed, the
first vehicle to be added to
MoMA's permanent collection.
The list goes on: the interior of

and the legendary Ferrari Dino

However, Pininfarina is not
resting on its laurels, but blasting
full speed ahead into the future
with an expanded portfolio
while honoring its heritage.
Whether it's a solution for
sustainable mobility, interior
designs, or household gadgets,
all Pininfarina projects bear an

visually celebrate the history and
influence of Pininfarina, there is

Engine Repair (A1). Cengage Learning

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my

home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-

Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst."
