The A Series engines
are a family of
inline-four
internal combustion
engines with
displacement from
1.3 L to 1.8 L
produced by Toyota
Motor Corporation.
The series has cast
iron engine blocks
and aluminum
cylinder heads. To
make the engine as
short as possible,
the cylinders are
siamesed. The
original 1A engine
was only 550 mm
long. The
development of the
series began in the
late 1970s, when
Toyota wanted to
develop a
completely new
engine for the
Toyota Tercel,
successor of
Toyota's K engine.
