Stance Auto Magazine Crowood

This is the story of a sixty-five year old woman who was living the good life in retirement with her husband of seven years. They spent every day crabbing, fishing, boating, clamming, beach-combing and the like when she found herself in the ranks of widowhood. She declared she got a sign when she asked God, "Now what do I do with the rest of my life?" Many times in recent years she thought about seeing the old cottage of her youth in Wisconsin. On her daily walk one day along the Russian River, she heard a voice from somewhere that said "go." Just the one word was enough to get her thoughts in motion to do just that. She could never read a map, but that never entered her head. She reasoned she knew how to get to Reno, Nevada from where she lived, and from there she could go northeast and find Elkhorn, Wisconsin and the cottage. So, gathering all the amenities she needed for camping (a sleeping bag, tent, a bag of brown rice, a bag of coffee, a one burner stove and her .38), she was determined to go.

The Mazda Miata is one of the most popular sports cars on the road today. In production for more than 20 years, the

Miata's popularity has grown, and the number of aftermarket components available to the Miata enthusiast has grown, too. This immense selection of parts has made it difficult for many would-be modifiers to choose the proper combination that will help them reach the goals they have set for their two-seaters. Author and Miata expert Keith Tanner has been modifying, repairing, building, and racing Miatas for years, and he will guide you through how to best modify your car to suit your needs, starting with an explanation on how everything works and how the various parts will interact. You'll not only learn what upgrades will help you reach your goals, but also how to adjust or modify what you have to make your car work at its best. From autocross to cross-country touring, the Miata can do it all. Keith Tanner tells you how to make it happen!

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in *Nikkei Sangyo Shimbun* (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the *Topeka Capital-Journal* and the September 13, 1983 issue of the *Asian Wall Street Journal*. The *Topeka Capital-Journal* headline read, "MacArthur's Jeeps Were the Toyota Catalyst."

The photos in this edition are black and white. When the '96 Mustang came out

with the 4.6-liter V-8, some performance enthusiasts were scared away by its technology. But those days are long gone. Ford added horsepower and torque to its 2- and 4-valve V-8s over the years, and the number and quality of available aftermarket performance parts has exploded. Ford took things to the next level with the new 3-valve Mustang GT engine, the 5.4-liter GT and the Shelby GT500, adding even more high-performance options. In this updated edition of "How To Build Max-Performance 4.6-Liter Ford Engines," Sean Hyland gives you a comprehensive guide to building and modifying Ford's 2-, 3-, and 4-valve 4.6- and 5.4-liter engines. You will learn everything from block selection and crankshaft prep, to cylinder head and intake manifold modifications. He also outlines eight recommended power packages and provides you with a step-by-step buildup of a naturally aspirated 405-horsepower Cobra engine. This is the definitive guide to getting the most from your 4.6- and 5.4-liter Ford.
