This Is Not an Atlas NYU Press

This Is Not an Atlas gathers more than 40 counter-cartographies from all over the world. This collection shows how maps are created and transformed as a part of political struggle, for critical research or in art and education: from indigenous territories in the Amazon to the anti-eviction movement in San Francisco; from defending commons in Mexico to mapping refugee camps with balloons in Lebanon; from slums in Nairobi to squats in Berlin; from supporting communities in the Philippines to reporting sexual harassment in Cairo. This Is Not an Atlas seeks to inspire, to document the underrepresented, and to be a useful companion when becoming a counter-cartographer yourself.

Create physical interfaces that interact with the Internet and web pages. With Arduino and JavaScript you can create interactive physical displays and connected devices that send data to or receive data from the web. You'll take advantage of the processes needed to set up electronic components, collect data, and create web pages able to

interact with electronic components. Through exercises, projects, and explanations, this book will give you the core front end web development and electronics skills needed to create connected physical interfaces and build compelling visualizations with a range of JavaScript libraries. By the end of the book you will have developed fully working interactive prototypes capable of sending data to and receiving data from a physical interface. Most importantly, Connecting Arduino to the Web will give you a taste of what is possible and the knowledge to create your own connected physical interfaces and bring the web into your electronics projects. What You'll Learn Build an

Internet of Things dashboard that updates with electronics attached to an Arduino Use components to interact with online 3D displays Create web pages with HTML and CSS Set up a Node.js server Use WebSockets to process live data Interact with scalable vector graphics (SVG) Who This Book Is For Technologists, developers, and enthusiasts looking to extend their skills, be able to develop physical prototypes with connected devices, and with an interest in getting started with IoT. Also, those excited by the possibilities of connecting the physical and the web.

A GUIDED TOUR OF BOSTON'S UNDERWORLD, REVEALING THE PLACES WHERE DEALS WERE MADE, PEOPLE WERE KILLED, AND BODIES WERE BURIED Gangsters have played a shady role in shaping Greater Boston's history. While lurking in local restaurants or just around the corner inside that inconspicuous building, countless criminals have quietly made their mark on the city and surrounding communities. Gangland Boston reveals the hidden history of these places, bringing readers back in time to when the North End was wrought with gun violence, Hanover Street was known as a "shooting

gallery," and guys named King Solomon, Beano Breen, and Mickey the Wiseguy ruled the underworld. Drawing upon years of research and an extensive collection of rare photographs, author Emily Sweeney sheds light on how gang violence unfolded during Prohibition, how the Italian mafia rose to power, and how the Gustin Gang came to be. She also uncovers little-known facts about well-known crime figures (Did you know the leader of the Gustin Gang was an Olympic athlete? Or that a fellowship at a major university was named after a big-time bookie?) From South Boston to Somerville, Chinatown to Charlestown, and every neighborhood in between, readers will get to know mobsters in ways they never have before. Readers will find out: * Exact addresses where mobsters lived, worked, and played around Greater Boston * How an Olympic athlete became one of Boston's most notorious gangsters * The untold history of the Gustin Gang * Frank Sinatra's connection to a long-forgotten Massachusetts racetrack * Little-known facts about David "Beano" Breen, Charles "King" Solomon, Harry "Doc" Sagansky, Raymond L.S. Patriarca, and other

Contemporary theory is full of references to the modern and the postmodern. How

useful are these terms? What exactly do they mean? And how is our sense of these terms changing under the pressure of feminist analysis? In *Doing Time*, Rita Felski argues that it makes little sense to think of the modern and postmodern as opposing or antithetical terms. Rather, we need a historical perspective that is attuned to cultural and political differences within the same time as well as the leaky boundaries between different times. Neither the modern nor the postmodern are unified, coherent, or self-evident realities. Drawing on cultural studies and critical theory, Felski examines a range of themes central to debates about postmodern culture, including changing meanings of class, the end of history, the status of art and aesthetics, postmodernism as "the end of sex," and the politics of popular culture. Placing women at the center of analysis, she suggests, has a profound impact on the way we think about historical periods. As a result, feminist theory is helping to reshape our vision of both the modern

and the postmodern.

The story is based partially in the island of Jamaica and in America. It traces the life of a family from the 1970s into the future and explores the relationship between individual behaviour, greed, selfishness, societal violence, organized crime, tribalism, gang and urban warfare, science and genetics as a consequence of the impact of the global village and ambitions of geo-politics and world domination. It explores how the thirst and thrust for world domination impacts on the lives and relationship of the family, and their neighbours, and how these

factors affects individuals actions which in turn affect the collective consciousness of a nation and lead to murder, mayhem, and social degradation. It explores the reactive and dangerous steps taken by members of this family in order to survive. Though informative and instructive, the book is a fast paced action pack story with lots of unexpected turns and developments as it builds up the reader with adrenaline paced narrative. You never quite know what is coming next. The story, though fictionalized, is predicated and inspired by true events, the composite of lives of real persons and the extrapolation of cause, effects, conscience, and consequences. It examines how the

attitude and actions of individuals on each other can affect these individual and impacts on the wider society and the world far into the future with multiplying effects. It also looks at the role that science, religion, nuclear proliferation, and politics will play in the future world. Some of the names, locations, persons, and situations were changed, altered, and fictionalized in order to conceal the identity of some of the persons and characters, places, and to also add dramatic effect and to magnify and illustrate pertinent points and ideas.
