'The Camper Cookie: Easy Recipes and Cool Tips for Your Campervan Life' is a friendly cookbook full of easy, delicious recipes that you can make in a campervan kitchen. The book also has some really helpful tips for cooking in a campervan like: how to create a capsule larder that uses the same ingredients for many meals or kitchen kit, like silicone lids, that help to make your cooking life easier. The recipes are also really good for weekday meals when you get in from work and want

proper food but want something quick and simple. Summer is a passionate campervanner who also loves good food and she now blogs and writes books about the easy, home-style recipes that she creates for the campervan life. Summer and her partner, Glyn, had been camping for many years but got fed up with putting up a tent in the half-light on a Friday night or taking it down in the rain at the end of a wet weekend so decided to buy themselves a small campervan. They went to the campervan shows but realised that their very small budget would buy them barely more than a wheel there! But then they found a company that sold converted Toyota Previas for a reasonable price and their new campervan, 'Trev-the-Prev' came in to their life. Summer had Chronic Fatigue Syndrome for many years but healed herself by researching, like a maniac, everything to do with mind-body health. She realised that nutritious food is very important to staying well and happy but found that it was not so easy to cook good food in the limited kitchen that you get in a small

campervan. So she started to search for and develop easy real-food recipes that they could cook when they were out having adventures. She loves to share her recipes so she started up a blog (www.thecampercookie.com) and also writes recipe books for campervan cooking. She also demonstrates her recipes on YouTube and at shows.

The Global status report on road safety 2018 launched by WHO in December 2018 highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians cyclists and motorcyclists in particular those living in developing countries. The report suggests that the price paid for mobility is too high especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and

alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Two-Stroke Performance Tuning

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching

that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst."
