This fascinating visual account of firearms shows everything from the earliest cannons to modern weapons of war. It also highlights how gun technology and military tactics developed in tandem over time. Centuries ago, the Chinese discovered that if they put gunpowder and a projectile into a metal tube and ignited it, they could fire the projectile with enormous force. The first guns were born. *Firearms: An Illustrated History* showcases over 300 firearms including pistols, revolvers, rifles, shotguns, machine-guns, and artillery, each with annotated close-up photographs and details of their origins, barrel, and caliber. It details the use of the firearms, not just in the military but for sport, hunting, and law enforcement. This comprehensive volume traces the history of firearms, highlighting "turning points" such as the rifle with its parallel spiraled grooves that could impart a spin to bullets making them fly straighter. It also showcases iconic firearms such as the Walther PPK self-loading pistol popularised in James Bond films. With information on the great gunsmiths including Beretta and Kalashnikov and a detailed guide to how guns work, *Firearms: An Illustrated History* is an essential purchase for everyone interested in guns and military history.

Forget hurrying. Forget putting your foot down and racing through sweeping bends. Forget the understeer (whatever that is). Forget the blur of a life lived too fast. This is a look at taking life slowly. It's about taking the time to enjoy

journeys and places for their own sake. It's about stopping and putting the kettle on. Stopping to take a picture.

Stopping to enjoy stopping. How are you going to do it? In a camper van or a motorhome, of course. In this book we define the best driving routes around Scotland for camper vans and motorhomes. We show you the coolest places to stay, what to see, what to do and explain why it's special. We meander around the highlands, lowlands and islands of Scotland on the most breathtaking roads, chugging up mountain passes and pootling along the coast. We show you stuff that's fun, often free. We include the best drives for different kinds of drivers; for surfers, wildlife watchers, climbers and walkers. We include the steepest, the bendiest, those with the most interesting bridges or views or obstacles, ferries and tidal causeways. And you don't even have to own a camper van or motorhome – we'll tell you the many places you can rent one to take you on the journey. All of this is interspersed with beautiful photos, handy maps and quirky travel writing from the king of camper vans and motorhomes, Martin Dorey. So if all you want to do is flick through it on a cold day and plan your next outing, you'll be transported (albeit slowly) to pastures, beaches, mountains and highways that make you want to turn the key and go, go, go! We'll take you to see Scotland the slow way. The way it should be seen. *Global Status Report on Road Safety 2018* Springer

The Prosecution of Anwar Ibrahim: The Final Play Macmillan

In George Town, the capital of Penang, the Pearl of the Orient and a Malaysian island hugely popular with domestic and international tourists, trishaws ply the streets ferrying tourists between colonial buildings, temples, food spots and bars. The more enterprising trishaw drivers offer sightseeing with sex, sometimes with unexpected results. Through candid interviews with sources in the sex industry, as well as Penang's trishaw riders, the author discovers shocking scams, pitiful repentances and happy-ending massages that don't end happy. Penang Undercover also looks beyond Penang to the neon lights of neighbouring Hatyai and Bangkok in Thailand to expose the shenanigans of mamasans, bargirls, dream-makers and liars. Finally, the author unearths a few hidden nuggets from his hometown of Kuala Lumpur and the subject of his first two books in the Undercover series. Typical of his style, this book is written with wit and candour.

This e-book details the most interesting and important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with "motor" referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.

Car-tastrophes John Wiley & Sons

In Japan it's called the "Ghosn Shock"—the stunning arrest of Carlos Ghosn, the jet-setting CEO who saved Nissan and made it part of a global automotive empire. Even more shocking was his daring escape from Japan, packed into a box and put on a private jet to Lebanon after months spent in a Japanese detention center, subsisting on rice gruel. This is the saga of what led to the Ghosn Shock and what was left in its wake. Ghosn spent two decades building a colossal partnership between Nissan and Renault that looked like a new model for a global business, but the alliance's shiny image fronted an unsteady, tense operation. Culture clashes, infighting among executives and engineers, dueling corporate traditions, and government maneuvering constantly threatened the venture. Journalists Hans Greimel and William Sposato have followed the story up close, with access to key players, including Ghosn himself. Veteran Tokyo-based reporters, they have witnessed the end of Japan's bubble economy and attempts at opening Japan Inc. to the world. They've seen the fraying of keiretsu, Japan's traditional skein of business relationships, and covered numerous corporate scandals, of which the Ghosn Shock and Ghosn's subsequent escape stand above all. Expertly reported, *Collision Course* explores the complex suspicions around what and who was really responsible for Ghosn's ouster and why one of the top executives in the world would risk everything to escape the country. It explains how economics, history, national interests, cultural politics, and hubris collided, crumpling the legacy of arguably the most important foreign businessman ever to set foot in Japan. This gripping, unforgettable narrative, full of fascinating characters, serves as part cautionary tale, part object lesson, and part forewarning of the increasing complexity of doing global business in a nationalistic world.

Take the Slow Road: Scotland Bloomsbury Publishing
On 9 January 2012, after a lengthy two-year trial, Anwar Ibrahim was acquitted of charges of sodomy against his 23-year-old aide, Mohd Saiful. The acquittal was a shock not only to Anwar – who expected to go to jail – but to most international observers who were convinced he would be found guilty. This book recounts both the first sodomy episode (1998-2004) and the Sodomy II trial (2008–2012). It then takes up the story after the acquittal, describing the events that led to the Malaysian Court of Appeal overturning the ruling in March 2014 – convicting Anwar of the charge and sentencing him to five years' imprisonment – the final appeal against the conviction in the Federal Court of Malaysia In October 2014, and the guilty verdict that was finally delivered on 10 February 2015. Anwar is now in prison serving a five-year sentence.

The 2014 conviction ruled him out of contesting a by-election for the parliamentary state seat of Kajang and plans to become the chief minister of Selangor. At the same time his lawyer, Karpal Singh, was convicted of sedition, which disqualified him from parliament. Together, these events were seen as an attack on the key leaders of the opposition parties

Karpal Singh is widely regarded as Malaysia's best criminal and constitutional lawyer. His sudden death on 17 April 2014 in a horrific car accident – just a month after he was convicted of sedition in the High Court – shocked and saddened Malaysians to the core and left a deep void in the country's legal and political landscape. Karpal was a fearless advocate for justice and a defender of human rights in South East Asia, and has appeared in the Privy Council in London on a number of occasions before such appeals were abandoned by Malaysia. He is renowned for his defence of many people from many nations who have faced the death penalty under Malaysia's Dangerous Drugs Act. In recent years, one of his biggest achievements was his successful defence of former Deputy Prime Minister Anwar Ibrahim on two charges of sodomy in 2012. On the night he died, Karpal was still fighting for Anwar, who had been convicted once again of sodomy, and seeking to reassure him. He told the Opposition leader in a telephone call he would do his best in the prosecution's 'fast-tracked' Federal Court of Appeal. Indeed Karpal had Anwar's files with him in his vehicle when the fateful crash occurred. In this revised and updated edition, veteran journalist Tim Donoghue completes the biography of Malaysia's tenacious and principled lawyer-politician

The Global status report on road safety 2018 launched by WHO in December 2018 highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians cyclists and motorcyclists in particular those living in developing countries. The report suggests that the price paid for mobility is too high especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.
