Now he's home, recovering from an injury, but it seems the war has followed him back. He needs pills to get any sleep, a young woman is trying to persuade him into speaking out against military recruitment tactics, and his grandfather is already urging him back onto the

'Automotive Computer Controlled Systems' explains the fundamental principles of engineering that lie behind the operation of vehicle electronic systems. Having obtained this knowledge, the reader will be able to make full use of the diagnostic equipment which is currently available. The book builds on the concepts contained in Vehicle Electronic Systems and Fault Diagnosis and gives clear steps to fault diagnosis and subsequent repair of the vehicle's electronic systems. The author discusses electronics only within the context of the vehicle systems under consideration, and thus keeps theory to a minimum. Allan Bonnick has written articles for several transport/vehicle journals and carries out consultancy work for the Institute of Road Transport Engineers. In addition, he has had many years teaching experience and is

ideally placed to write this informative guide.

Everyone wants to be loved--to find someone who will stick with them through all of life's ups and downs, someone who is in it for the long haul. But in a world where dating is increasingly based on split-second decisions and geared toward casual relationships rather than marriage, it's easy for single people to feel discouraged, used, or unworthy of true love and lasting affection. Reality just never seems to match up with our (often wildly unrealistic) expectations. Jonathan "JP" Pokluda has counseled thousands of young singles through the pain and heartbreak of dating the world's way. Now he wants to dispel the myths, misconceptions, and fairy tales you've believed about dating and replace them with the truth from the One who invented marriage, created you to crave relationship, and is the very embodiment of true love. With plenty of true stories about relationships healed and love

found, this practical book explains God's purposes for singleness, dating, and marriage and covers why you should date, who you should date, and how you should date. If you're ready to trade the world's way of dating for the way that actually works, it's time to begin dating well.

At ten, painting a perfect Mona Lisa made Annie Kincaid a prodigy. A similar copy at seventeen made her a crook.

Lesson learned: genuine art is priceless, and forgery gets you arrested. Now Annie puts her artistic talents to honest use as a faux finisher in San Francisco.

But her past may not be painted

over as well as she thought...

Annie's got bad news for her ex-boyfriend, curator Ernst Pettigrew: the snooty Brock Museum's new fifteen-million-dollar Caravaggio painting is as fake as a three-dollar bill. And the same night Annie makes her shattering appraisal, the janitor on duty is killed—and Ernst disappears. To top it all off, a well-known art dealer has absconded with multiple Old Master drawings, leaving yet more forgeries in their places.

Finding the originals—and pocketing the reward money—will get Annie's new landlord off her back. But it could also draw her into the underworld of fakes and forgers she swore she'd left behind, starting with a close encounter with a changeable but charming art thief...
