Guide to New Cars for Model Year 1988
Hoover Institution Press
This is a print on demand edition of a
hard to find publication. Explores whether
sufficient data exists to examine the
temporal and spatial relationships that
existed in terrorist group planning, and if
so, could patterns of preparatory conduct
be identified? About one-half of the
terrorists resided, planned, and prepared
for terrorism relatively close to their
eventual target. The terrorist groups
existed for 1,205 days from the first
planning meeting to the date of the
actual/planned terrorist incident. The
planning process for specific acts began

2-3 months prior to the terrorist incident.
This study examined selected terrorist
groups/incidents in the U.S. from
1980-2002. It provides for the potential
to identify patterns of conduct that might
lead to intervention prior to the
commission of the actual terrorist
incidents. Illustrations.
