For the first time ever, a comparative survey of 95
percent of the fiberglass pocketcruising sailboats ever
built Author Steve Henkel has researched hundreds
of cruising sailboats less than 26 feet long--pocket
cruisers--to create this definitive gallery and
handbook of the small cruising sailboats built in the
last 45 years. With detailed plans, specifications,
performance indexes, and commentary for every
model the author could find (360 in all!), The
Sailor 's Book of Small Cruising Sailboats is your
ideal core reference for the used and new boats you
see on the water.

According to CNW

Marketing/Research, 53 million used cars were sold in 1994 in the United States alone. By the end of 1999, CNW forecasts the used car market will soar to 63.5 million units as the rising cost of new cars forces millions into second-hand cars. Millions of people need car-buying information every year in a market destined to increase. THE USED CAR BUYER'S MANUAL offers this much needed car-buying information. Divided into three parts, part one shows how to buy a car from a private party. Part two details how to buy a car through a dealer. In the third part, UCBM offers advice on how to sell your car along with tips designed to keep your car running problem free. The UCBM also offers a vehicle inspection checklist designed to be photocopied for the reader's convenience. But the most impressive information UCBM offers is its Directory of Reliable Used Cars Appendix. UCBM shows you which cars are reliable by listing over a hundred models & then taking the best in each class & offering them as the creme de la creme. Contact Marketing Director Dave Austin, P.O. This study addresses the adequacy of
traffic safety in work zones. The
specific safety issues discussed in
this study are: the usefulness of work
zone accident data; the hazards of two-
lane, two-way operations without

positive separation of traffic on a
normally divided highway; the use of
truck-mounted attenuators in
moving/maintenance operations and at
long-term construction sites; the
placement of flaggers; the need to
identify design changes in work zones
that will aid drivers with degraded
sensory perceptions resulting from
aging, inattentiveness, or impairment;
the lack of compliance with existing
guidelines for work zone traffic control
devices and procedures; and the need
for a national work zone safety
program. Recommendations
concerning these issues were made to
the National Highway Traffic Safety
Administration, the Federal Highway
Administration, and the American
Association of State Highway and
Transportation Officials.
