An award-winning  
scientist offers his  
unorthodox  
approach to  
childrearing:  
“ Parentology is

brilliant, jaw-  
droppingly funny,  
and full of  
wisdom...bound to  
change your  
thinking about  
parenting and its  
conventions ”  
(Amy Chua, author  
of Battle Hymn of  
the Tiger Mother).  
If you ’ re like  
many parents, you

---

might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to

do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and

happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time. VW Golf, GTI, Jetta and Cabrio, 1999 Thru 2002 Simon and Schuster Every Haynes manual is based
