The Mastercam 2022 Black Book  
(Colored) is the 2nd edition of our series on  
Mastercam. The book is authored to help  
professionals as well as learners in creating  
some of the most complex NC toolpaths.  
The book follows a step by step  
methodology. In this book, we have tried to  
give real-world examples with real  
challenges in designing. We have tried to  
reduce the gap between university use of  
Mastercam and industrial use of  
Mastercam. The book covers almost all the  
information required by a learner to master  
Mastercam. The book starts with basics of  
machining and ends at advanced topics like  
Multi-axis Machining Toolpaths. Some of  
the salient features of this book are: In-  
Depth explanation of concepts Every new  
topic of this book starts with the  
explanation of the basic concepts. In this  
way, the user becomes capable of relating  
the things with real world. Topics Covered

Every chapter starts with a list of topics  
being covered in that chapter. In this way,  
the user can easily find the topic of his/her  
interest easily. Instruction through  
illustration The instructions to perform any  
action are provided by maximum number of  
illustrations so that the user can perform the  
actions discussed in the book easily and  
effectively. There are about 810 small and  
large illustrations that make the learning  
process effective. Tutorial point of view At  
the end of concept's explanation, tutorials  
make the understanding of users firm and  
long lasting. Almost each chapter of the  
book related to machining has tutorials that  
are real world projects. Moreover most of  
the tools in this book are discussed in the  
form of tutorials. For Faculty If you are a  
faculty member, then you can ask for video  
tutorials on any of the topic, exercise,  
tutorial, or concept.
