How to Lead Others Bloomsbury Publishing  
Electric Field Analysis is both a student-friendly textbook and a valuable tool for engineers and physicists engaged in the design work of high-voltage insulation systems. The text begins by introducing the physical and mathematical fundamentals of electric fields, presenting problems from power and dielectric engineering to show how the theories are put into practice. The book then describes various techniques for electric field analysis and their significance in the validation of numerically computed results, as well as: Discusses finite difference, finite element, charge simulation, and surface charge simulation methods for the numerical computation of electric fields Provides case studies for electric field distribution in a cable termination, around a post insulator, in a condenser bushing, and around a gas-insulated substation (GIS) spacer

Explores numerical field calculation for electric field optimization, demonstrating contour correction and examining the application of artificial neural networks Explains how high-voltage field optimization studies are carried out to meet the desired engineering needs Electric Field Analysis is accompanied by an easy-to-use yet comprehensive software for electric field computation. The software, along with a wealth of supporting content, is available for download with qualifying course adoption.

How difficult it can be to forgive others or to accept forgiveness or to accept that someone who had offended the community has been reconciled and accepted back into it. For two millennia Christians have pondered the scope of the forgiveness Jesus taught and lived. They have celebrated practices and rites that have enabled the faithful to forgive, to be forgiven, and to accept that God brings reconciliation even when we find it almost impossible to forgive. This

---

book traces that history to the present, offering a sense not only of how the rites of reconciliation matter to Catholics but how our struggles with forgiveness are a real contribution to reconciliation in our world.

In any job, there will come a time when you are asked to lead other people. But while people are often well trained in the skill set of their particular profession, few people are ever taught how to lead. As such, those first steps into leadership can seem daunting - what do you actually do? How do you really lead? How do you build

---

an effective team? And how do you lead colleagues who used to be your peers? How to Lead Others aims to convey the basics of leadership in a way that is concise, relevant and practical by breaking down leadership into eight simple lessons: • Defining the task; • Effective planning; • Briefing; • Controlling; • Motivating; • Organizing; • Evaluating; and • Leading by example. Aimed at those who, regardless of industry or business sector, are about to take their first steps on the leadership path, or who are at

an early stage in their career and realise that leadership responsibilities lie ahead of them, How to Lead Others is the essential handbook to one of the most important and challenging aspects of professional life.

Katelyn Wolfraum was a MI6 agent with a promising career carving up Nazis until one little "Oops" had the King of England place a shoot-on-sight order on her pretty red head and sent her underground. A few years later, with the Third Reich overrunning the free world, Kat ends up trapped hundreds of hellish North

African desert miles behind enemy lines with a motley group of misfits. As they work their way back to friendly lines, they team with "The Long Range Desert Group." Together, they begin a terror campaign against the Germans, shattering Rommel's supply lines, scalping Nazis and driving the Gestapo and SS crazy. Ultimately, Kat gets a chance to redeem herself when she stumbles upon Hitler's plan to use the most powerful Wunderwaffe in the history of warfare. But she has a small problem... How can a disgraced and wanted ex MI6 assassin convince the British Command
