What is intelligence-
led policing? Who
came up with the
idea? Where did it
come from? How does
it relate to other
policing paradigms?
What distinguishes an
intelligence-led
approach to crime
reduction? How is it
designed to have an
impact on crime? Does

it prevent crime? These are just a few of the questions that this book seeks to answer. This revised and updated second edition includes new case studies and viewpoints, a revised crime funnel based on new data, and a new chapter examining the expanding role of technology and big data in intelligence-led policing. Most importantly, the author builds upon an updated definition of intelligence-led policing as it has evolved into a framework capable of encompassing more operational police activity than simply organized crime and recidivist offenders. Topics covered in this book include:

- The origins and aims of intelligence-led policing
- A comparison of intelligence-led policing with other conceptual models of policing
- An exploration of analysis concepts and the role of analysis in target-selection
- Evaluations of intelligence-led policing as a crime-

control strategy
Written by an expert in the field, this book offers a comprehensive and engaging introduction to intelligence-led policing for students, practitioners and scholars of policing, criminal intelligence and crime analysis. This book will be of particular interest to professionals within the law enforcement environment; senior officers, middle management, analysts and operational staff. A companion website offers a range of resources for students and instructors, including slides, chapter headings with supporting notes, key terms and names, critical-thinking questions, and quizzes.

The Toyota Way Fieldbook

Fodor's

Investigations into how technologies became peculiar forms of politics in an expanded geography of the Cold War. The Cold War was not simply a duel of superpowers. It took place not just in Washington and Moscow but also in the social and political arenas of geographically far-flung countries emerging from colonial rule. Moreover, Cold War tensions were manifest not only in global political disputes but also in struggles over technology. Technological systems and expertise offered a powerful way to shape countries politically, economically, socially, and culturally. Entangled Geographies explores how Cold War politics, imperialism, and postcolonial nation building

became entangled in technologies and considers the legacies of those entanglements for today's globalized world. The essays address such topics as the islands and atolls taken over for military and technological purposes by the supposedly non-imperial United States, apartheid-era South Africa's efforts to achieve international legitimacy as a nuclear nation, international technical assistance and Cold War politics, the Saudi irrigation system that spurred a Shi'i rebellion, and the momentary technopolitics of emergency as practiced by Medecins sans Frontières. The contributors to *Entangled Geographies* offer insights from the anthropology and history of development, from diplomatic history, and from science and technology studies. The book represents a unique synthesis of these three disciplines, providing new perspectives on the global Cold War.

Professional Forensic Investigation of Stolen-Recovered and Other Crime-Related Vehicles provides unique and detailed insights into the investigations of one of the most common crime scenes in the world. In addition to a thorough treatment of

auto theft, the book covers vehicles involved in other forms of crime—dealing extensively with the various procedures and dynamics of evidence as it might be left in any crime scene. An impressive collection of expert contributors covers a wide variety of subjects, including chapters on vehicle identification, examination of burned vehicles, vehicles recovered from under water, vehicles involved in terrorism, vehicle tracking, alarms, anti-theft systems, steering columns, and ignition locks. The book also covers such topics as victim and witness interviews, public and private auto theft investigations, detection of trace evidence and chemical traces, vehicle search techniques, analysis of automotive fluids, vehicle registration, document examination, and vehicle crime mapping. It is the ultimate reference guide for any auto theft investigator, crime scene technician, criminalist, police investigator, criminologist, or insurance adjuster. Extensively researched and exceptionally well-written by internationally-

recognized experts in auto theft investigation and forensic science All the principles explained in the text are well-illustrated and demonstrated with more than 450 black and white and about 100 full-color illustrations, many directly from real cases Serves as both a valuable reference guide to the professional and an effective teaching tool for the forensic science student

Fodor's Vietnam DIANE Publishing Life in Crisis tells the story of Médecins Sans Frontières (Doctors Without Borders or MSF) and its effort to "save lives" on a global scale. Begun in 1971 as a French alternative to the Red Cross, the MSF has grown into an international institution with a reputation for outspoken protest as well as technical efficiency. It has also expanded beyond emergency response, providing for a wider range of endeavors, including AIDS care. Yet its seemingly

simple ethical goal proves deeply complex in practice. MSF continually faces the problem of defining its own limits. Its minimalist form of care recalls the promise of state welfare, but without political resolution or a sense of well-being beyond health and survival. Lacking utopian certainty, the group struggles when the moral clarity of crisis fades. Nevertheless, it continues to take action and innovate. Its organizational history illustrates both the logic and the tensions of casting humanitarian medicine into a leading role in international affairs.
