HandbookToyotaToyota  
In nine eventful years  
- 1957 to 1965 - the  
six-cylinder-engined  
Austin Healey evolved  
into a formidable and  
increasingly  
specialised rally car.  
By any standards, it  
was the first of the  
"homologation  
specials" - a type  
made progressively  
stronger, faster, more  
versatile, and more  
suitable for the  
world's toughest  
International rallies.  
Though the motorsport  
foundations had been  
laid by the Healey  
Motor Co. Ltd, the  
work needed to turn  
these cars into rock-

sold 210bhp projectiles  
was almost all  
completed by the world-  
famous "works" BMC  
Competitions  
Department at  
Abingdon. It was  
because of their vast  
experience that the  
"Big Healeys" as they  
were always  
affectionately known -  
became fast and tough,  
nimble yet durable, so  
that they were capable  
of winning major  
events wherever  
traction could be  
assured. Not only did  
the "works" Austin  
Healeys win some of  
the world's most  
famous events -  
including Liege-Sofia-  
Liege, Spa-Sofia-Liege  
and the French and  
Austrian Alpine  
rallies, but they were  
also supremely fast on  
events like the Tulip,  
and came so close, so  
often, to winning  
their home event, the

---

British RAC Rally, which traditionally ended the season. Not only did these cars turn their drivers - Pat Moss, Donald Morley, Rauno Aaltonen, Timo Makinen and Paddy Hopkirk among them - into heroes, but individual cars seemed to take on a character and reputation of their own. This book lists each and every success, each and every notable car, and traces exactly how the machinery developed, and improved, from one season to the next. Over time, the "works" cars not only adopted aluminium cylinder heads and body panels, much-modified chassis, transmission and exhaust systems, but they also became supremely strong and could withstand a true battering on the

world's toughest events. This book relates how the cars were improved by the engineers, how the drivers came to love their heavy and sometimes self-willed steeds, and how the management team got the most out of everything - machinery, personnel, drivers, and regulations. . Heavily illustrated and packed with technical detail this book will make a welcome addition to any motorsport fans library.

The Cumulative Book Index

Over 220,000 entries representing some 56,000 Library of Congress subject headings. Covers all disciplines of science and technology, e.g., engineering, agriculture, and domestic arts. Also

---

contains at least 5000 titles published before 1876. Has many applications in libraries, information centers, and other organizations concerned with scientific and technological literature. Subject index contains main listing of entries. Each entry gives cataloging as prepared by the Library of Congress. Author/title indexes.
