This must change. In *Geekonomics*, David Rice shows how we can change it. Rice reveals why the software industry is rewarded for carelessness, and how we can revamp the industry's incentives to get the reliability and security we desperately need and deserve. You'll discover why the software industry still has shockingly little accountability—and what we must do to fix that. Brilliantly written, utterly compelling, and thoroughly realistic, *Geekonomics* is a long-overdue call to arms. Whether you're software user, decision maker, employee, or business owner this book will change your life...or even save it.

A STORY OF UNSUNG BRAVERY AT A DEFINING MOMENT IN BRITAIN'S HISTORY 'Superb' Stephen Fry 'Thrillingly told' Dan Jones 'Fascinating' Neil MacGregor 'Astonishing' Peter Frankopan We like to think we know the story of how Britain went to war with Germany in 1939, but there is one chapter that has never been told. In the early 1930s, a group of young, queer British MPs visited Berlin on a series of trips that would change the course of the Second World War. Having witnessed the Nazis' brutality first-hand, these men were some of the first to warn Britain about Hitler, repeatedly speaking out against their government's policy of appeasing him. Prime Minister Neville Chamberlain hated them. Branding them 'the

glamour boys' to insinuate something untoward about them, he had their phones tapped and threatened them with deselection and exposure. At a time when even the suggestion of homosexuality could land you in prison, the bravery these men were forced to show in their personal lives gave them extraordinary courage in public. Undaunted, they refused to be silenced and when war came, they enlisted. Four of them died in action. And without them, Britain would never have faced down the Nazis. *A Guardian Book of Autumn* 2020

This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.
