Grants-Milan, New Mexico, is located on historic Route 66 between Albuquerque and Gallup. The Atlantic & Pacific Railroad hired three Grant brothers to establish Grant's Camp in 1882, including a post office and telegraph office. The railroad changed the way of travel, and the marketing of cattle, farm products, and timber created a number of booms for this little town. "Grant" was officially changed to "Grants" in 1935, and the village of Milan was established in 1957 by Salvador Milan. In 1946, he converted a sheep ranch to a truck farm, which resulted in Grants-Milan being designated the "Carrot Capital of the World." A uranium boom started in 1950 when the carrot boom busted. The uranium companies needed water and housing, while the auxiliary uranium businesses needed a place to operate, resulting in the village of Milan being incorporated since Grants refused to annex the original unincorporated Milan townsite.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz – rich cars, poor quality. There's only one Saturn you should buy. Toyota – enough apologies: "when you mess up, fess up."

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation. Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway. Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago. You can save \$2,000 by cutting freight fees and "administrative" charges. Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea.
