While war historians may disagree over whether Japan had plans to invade Australia in WW2, all will agree three Japanese midget submarines came into Sydney Harbour with serious intent in 1942. But little has surfaced [until now] of a fourth midget submarine and the story of survival of one of the Japanese crew. Alone and adrift, the youthful survivor was hauled aboard a coastal steamer only to be dumped on remote Lord Howe Island with another unwelcome passenger. The two survived in the wild for a while before an island woman came on the scene. Denied the pleasures of the island paradise, the Japanese submariner was inhumanely interned until an amorous liaison secured his passage to freedom. In 2006, 64 years later, bestselling Japanese novelist Hiraku Makimura lands in Sydney to speak at a writers' seminar. From the moment a young woman steps into his hotel room he is on an emotional rollercoaster, while driving a Subaru around Sydney turns into a fatal nightmare. The hotel receptionist is an added distraction, until a woman with her own agenda takes Makimura in hand, leading him surreally to an improbable rendezvous with the submerged past—an encounter that rocks him to the core of his being.

The Talented Clementine Simon and Schuster

Winner or washout? When it comes to tackling third grade, Clementine is at the top of her game—okay, so maybe not all the time. After her teacher announces that the third and fourth graders will be putting on

a talent show, Clementine panics. She doesn't sing or dance or play an instrument. She can't even hop with finesse. And as if she didn't feel bad enough, her perfect best friend, Margaret, has so many talents, she has to alphabetize them to keep them straight... As the night of the big "Talent-palooza" draws closer, Clementine is desperate for an act, any act. But the unexpected talent she demonstrates at the show surprises everyone--most of all herself. This Clementine sequel is sure to bring the house down!

Advanced Electric Drive Vehicles St. Martin's Griffin

Electrification is an evolving paradigm shift in the transportation industry toward more efficient, higher performance, safer, smarter, and more reliable vehicles. There is in fact a clear trend to move from internal combustion engines (ICEs) to more integrated electrified powertrains. Providing a detailed overview of this growing area, *Advanced Electric Drive Vehicles* begins with an introduction to the automotive industry, an explanation of the need for electrification, and a presentation of the fundamentals of conventional vehicles and ICEs. It then proceeds to address the major components of electrified vehicles—i.e., power electronic converters, electric machines, electric motor controllers, and energy storage systems. This comprehensive work: Covers more electric vehicles (MEVs), hybrid electric vehicles (HEVs), plug-in hybrid electric vehicles (PHEVs), range-extended electric vehicles (REEVs), and all-electric vehicles (EVs) including battery electric vehicles (BEVs) and fuel cell vehicles (FCVs) Describes the electrification technologies applied to nonpropulsion loads, such as power steering and air-conditioning systems Discusses hybrid battery/ultra-capacitor energy storage systems, as well as 48-V electrification and belt-driven starter generator systems Considers vehicle-to-grid (V2G) interface and electrical infrastructure issues, energy management, and optimization in advanced electric drive vehicles Contains numerous illustrations, practical examples, case studies, and challenging questions and problems throughout to ensure a solid understanding of key concepts and applications *Advanced Electric Drive Vehicles* makes an ideal textbook for senior-level undergraduate or graduate engineering courses and a user-friendly reference for researchers, engineers, managers, and other professionals interested in transportation electrification.

This book, first published in 1987, is about the classic free will problem, construed in terms of the implications of moral responsibility. The principal thesis is that the core issue is metaphysical: can scientific laws postulate objectively necessary connections between an action and its causal antecedents? The author concludes they cannot, and that, therefore, free will and determinism can be reconciled.

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers

improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

FrameMaker, which is at the core of the Adobe Technical Communication Suite, has long been the gold standard for writing, illustrating, and laying out technical documentation in print. With new features like support for rich media objects and powerful PDF export, FrameMaker excels at authoring online documents as well. This Classroom in a Book begins with a survey of the fundamentals of FrameMaker 11: setting up master pages, styling paragraphs, defining colors, placing graphics, creating tables, adding captions, cross-references, footnotes, and hyperlinks. Later chapters cover long-document features, such as tables of contents and indexes. Creating conditional text documents and preparing content for output to print or to screen (PDF or HTML) round out the coverage.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
