This engaging and clearly written textbook/reference provides a must-have introduction to the rapidly emerging interdisciplinary field of data science. It focuses on the principles fundamental to becoming a good data scientist and the key skills needed to build systems for collecting, analyzing, and interpreting data. The Data Science Design Manual is a source of practical insights that highlights what really matters in analyzing data, and provides an intuitive understanding of how these core concepts can be used. The book does not emphasize any particular programming language or suite of data-analysis tools, focusing instead on high-level discussion of important

This research focuses on the process of growth in the automobile industries in the ASEAN region. ASEAN is drawing attention both from the vantage point of its position as an automobile-producing region and as a potential automobile

market. Thailand in particular has long treated automobile production as a national strategy, and this research puts considerable focus on Thailand's initiatives. Since 2012, the authors have been carrying out on-site surveys and have visited many of the suppliers that form the local automobile industry; this published research represents a summary of those findings. The fields of specialty of this study 's respective authors differ, so analyses have been made from a range of vectors. In particular, the focus is on the supply chain in what is generally referred to as a keiretsu.

Hanoi: a maze of alleys, lakes, pagodas, jazz clubs, cafes, and Soviet statues. Even for us Vietnamese people, Hanoi is infamously inscrutable. It's Vietnam's enigma wrapped in a mystery, with egg cream on top. You can take the easy, well-trodden path: the tourist market, the tourist pho restaurant, the tourist beer street, and a dude in a glass case. Or you can go local: eat the pho that Vietnamese foodies eat, drink the coffee Vietnamese hipsters drink, and hang out on the other beer street, the one that's not in any guidebooks, the one for locals. I'll even show you a super-creepy abandoned amusement park. Instead of canned propaganda, you'll understand the real stories behind the places and people you're seeing. You'll meet "the locals." Yes, they'd love to chat with you, they want to practice their English, and no, they don't hate Americans. Nobody cares about the war anymore. We'll wander down sketchy alleys and experience amazing places you'd never find in mass-market, foreigner-produced, ChatGPT-written guidebooks. I'll also teach you practical skills to break away from the guided tours and well-worn tourist attractions: the lowdown on Vietnam visas (the rules were completely changed in 2023), how to get around, how to buy things, what to say, and what (and whom!) to avoid. My guidebooks took you to Saigon and Da Nang. You had a great time. Now, let's meet the final boss: Hanoi. You'll love it, I promise.

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at

developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. - Presents the latest requirements and challenges for personal transport applications - Gives an insight into the technical advances and research going on in the IC Engines field - Provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets
