Technical Abstract Bulletin Springer Science & Business Media

A distinguished team of principal investigators and their associates describe in step-by-step detail a cross-section of the latest research techniques available for studying the endocrine system. As a basis for sophisticated biochemical analysis of receptor properties, the contributors provide methods for the production and purification of a variety of receptors, including progesterone, glucocorticoid, and androgen. Other protocols allow the reader to experiment with DNA binding characteristics, hormone binding assays, and the use of combinatorial chemistry for drug discovery. A series of novel methods utilizing the latest advances in immunochemistry, yeast two-hybrid screening, and fluorescence are included for the detection and analysis of a variety of cellular proteins that influence steroid receptor effectiveness.

Therapeutic Recreation Leadership and Programming will help students learn the essential aspects of professional practice while developing a leadership mind-set. The book focuses on the day-to-day responsibilities of the therapeutic recreation specialist (TRS) while integrating ethical considerations into each aspect of the job. Readers will learn how to perform the daily work of a TRS while maintaining the highest

ethical standards of the profession. The book details · the principles, theories, and codes of ethics that will form the foundation of specialists' understanding of the field and set the stage for practice; · the knowledge, skills, and leadership principles that TRSs will need in order to help their clients accomplish therapeutic outcomes; · strategies that will guide TRSs in planning a wide range of programs and services, including information on frequently encountered health problems, major program areas, facilitation strategies, and client and program evaluation; and · methods for program organization and delivery that will prepare specialists to offer a regular schedule of therapeutic recreation programs that meet the needs of all of their clients, whether in group or individual settings. The book will arm students with the information and tools they need in order to succeed as therapeutic recreation specialists. It familiarizes students with their future clients by describing the health concerns most often encountered in therapeutic settings. Case studies for the most common concerns provide students with concrete examples of how programming works in various clinical settings. The book also provides specific recreation activities from five major program areas, along with information on the effectiveness of the activities, risk management concerns, and implementation strategies. Step-by-step instructions for structuring, planning, and leading both group and one-on-one sessions will prepare students to implement programs in a wide variety of settings. Stories from professionals in the field, examples of real and hypothetical clients, and case studies show students how to use the principles they've learned when leading programs. Learning activities help them to further explore the concepts in each chapter, and highlight boxes emphasize key ideas related to each chapter's

content. An instructor guide is available to course adopters at ww.HumanKinetics.com/TherapeuticRecreationLeadershipandProgramming.

This book constitutes the thoroughly refereed post-conference proceedings of the International Workshop on Service-Oriented Computing: Agents, Semantics and Engineering, SOCASE 2009, held in Budapest, Hungary, as an associated event of AAMAS 2009, the main international conference on autonomous agents and multi-agent systems. The 10 revised full papers presented were carefully reviewed and selected for inclusion in the book. The papers address a range of topics at the intersection of service-oriented computing, semantic technology, and intelligent multiagent systems, such as: service description and discovery; planning, composition and negotiation; semantic processes and service agents; as well as applications.

Creditors and collectors seek to recover consumer debts through the use of litigation and arbitration. But, neither litigation nor arbitration currently provides adequate protection for consumers. The system for resolving disputes about consumer debts is broken. To fix the system, federal and state governments, the debt collection industry, and other stakeholders should make a variety of significant reforms in litigation and arbitration so that the system is both efficient and fair.
Contents of this report: Introduction; Litigation and Arbitration Proceedings; Conclusion. Appendices: Debt Collection Roundtable (DCR) Panelists; Contributors to DCR; Agendas for DCR; DCR Public Comments; Sample State Debt Collection Checklists. Illustrations.

Crazing Technology for Polyester Fibers reviews PET fibers crazing in surface-active liquids and the use of the crazing mechanism for fiber modification by functional additives. The first chapter reviews existing literature, and subsequent chapters present the research of the authors, with an emphasis on how these techniques can be used to create

textiles for a wide variety of purposes. With two highly regarded and very experienced authors bringing together the latest information on polyester crazing technology, this book is essential reading for scientific researchers, engineers, and R&D professionals working on the development of fibers for improving the properties of textiles. - Explains fiber crazing mechanisms and processes with a view to their use in developing polyester-based high-performance textiles - Focuses on how this mechanism can be used to confer important characteristics, such as antimicrobial properties, reduced flammability, and repellency, making this essential reading for textile scientists and technicians - Explores novel techniques and methods for readers who require cutting-edge knowledge of developments in fiber crazing
