Clinical Guidelines (Nursing) : Tracheostomy management

After a tracheostomy is inserted, the patient is managed in either the Paediatric Intensive Care (PICU - Rosella) or Neonatal Unit (NNU - Butterfly) in the initial post-operative period and until after the first routine tracheostomy change. Ensure the tracheostomy equipment kit is present at the bedside with the patient.

Trach Care Documentation

Nurses provide tracheostomy care for clients with new or recent tracheostomy to maintain patency of the tube and minimize the risk for infection (since the inhaled air by the client is no longer filtered by the upper airways). Initially a tracheostomy may need to be suctioned and cleaned as often as every 1 to 2 hours.

Good care starts with preparation, before a patient even arrives. It is too late to realise an essential piece of equipment is missing in an emergency! We know that problems have occurred due to a lack of provision of basic and emergency equipment at the bedside. This can be helped by providing a checklist of essential bedside items and ensuring that systems are in place to order that kit to ...

TRACHEOSTOMY CARE June 2017

Clinical Guidelines for Tracheostomy Care A laryngectomy is a surgical procedure to remove part or all of the larynx, usually to treat cancer of the larynx. A total laryngectomy implies the complete surgical removal of the larynx and therefore a disconnection of the upper airway (nose and mouth) from the lungs.

Trach Care Documentation - 1x1px.me

What kind of things should you document after performing

trach care/suctioning? Sputum suctioned (type/color, maybe

consistency or amount?), amount of suctioning used (we

were told between 80-120mmHg), how many times you

suctioned, how well the patient tolerated the procedure....I

know I'm forgetting stuff! 1 Likes DLS_PMHNP, MSN, RN, NP

Tracheostomy

Think Trach...Think Trach Care A tracheostomy is viewed as a foreign body, thus the body responds by

producing mucous. The trach impairs the natural cilillary

movement to expel mucous Remember that since the

upper airway is bypassed the natural protective and

hydrating mechanisms are lacking so the patient is at

risk for infection.
