More specific aims are:

Tracheostomy Nursing Care and Management

Tracheostomy Skin Care The next section reviews the care of a patient at home. Your nurse will also teach you how to clean the stoma in the hospital. The skin around the trach requires special care. Secretions (mucus) from the trach can cause the skin to become red and sore if allowed remaining on the skin too long.

As

Tracheostomy Care/Suctioning

Suctioning a Tracheostomy The upper airway warms, cleans

and moistens the air we breath. The trach tube bypasses these mechanisms, so that the air via the tube is cooler, dryer and not as clean. In response to these changes, the body produces more mucus.

I have a lab practical on tracheostomy care/suctioning this upcoming Wednesday. Im not worried about the actual skill part, but Im kind of worried about the documentation. What kind of things should you document after performing trach care/suctioning? Sputum suctioned (type/color, maybe consisten...

Trach Care Documentation

Trach Care Documentation

A tracheostoma is an artificial opening made in the trachea just below the larynx. A tracheostomy tube is a tube that is inserted through the opening, or stoma, to create an artificial airway. Patients who need long-term airway support (long-term patients who are intubated) or who have a need to bypass the upper airway may receive a tracheostomy.

Clinical Guidelines (Nursing) : Tracheostomy management

EVALUATION/ DOCUMENTATION At the end of the procedure always check for the client's comfort level or reaction/s. Make sure to document the date and time of the performance of the procedure, the assessment made prior to tracheostomy care and if the cuff is maintained deflated or inflated depending on physician's order.

Tracheostomy Replacement (Adult, Neonatal, Peds)
