The nine papers in this volume were written for a conference on research in international trade and finance held at Princeton University in March 1973. Each author was asked to survey research on one major topic, with a view to answering three questions: What have we learned from recent empirical research? What are the major

gaps in present knowledge? How should we go about filling those gaps? When answering the second question, authors were urged to look at the practical requirements of those who must make policy concerning the international economy, and at the opportunities and insights offered by recent developments in pure theory. When answering the third, they were urged to look at developments in

econometric technique, newly available data, and work in progress in related fields.

Renowned trade theorist Koji Shimomura passed away in February 2007 at the age of 54. He published nearly 100 articles in international academic journals. The loss of this extremely productive economist has been an enormous shock to the economic profession. This volume has emerged from the great desire on the part of the

profession to honor his contributions to economic research. Contributors include authoritative figures in trade theory such as Murray Kemp, Ronald Jones, Henry Wan, and Wilfred Ethier, world-renowned macroeconomists such as Stephen Turnovski and Costas Azariadis, and leading Japanese economists such as Kazuo Nishimura, Makoto Yano, Ryuzo Sato, and Koichi Hamada. This broad range of contributors reflects Koji Shimomura's many connections as well as the respect he earned in the economic profession. This

volume offers the reader a rare opportunity to learn the views of so many renowned economists from different schools of thought. Agricultural Economics Research Springer Nature The motivation for the Eleventh Edition of ' Investment Management ' has been provided by the enthusiastic response of the readers and reviewers to the earlier editions which, together with reprints, were sold out within a few months of the Publication. The book has been presented as an introductory level text on the theory and practice of

investment. It has been accepted by the students of finance preparing for a paper on investment management, particularly the B.Com (H) VIth Semester (CBCS)/Annual Mode of University of Delhi. The highlight of the Eleventh Edition is the presentation of ' Concept Checks ' in the form of ' Test-Yourself ' at various places in different chapters. This will give an opportunity to the students to apply the concepts which they have read so far. Additional working notes and explanations have been provided at various places through out the book. Comments and suggestions

received from students as well as teachers have been duly incorporated. In an attempt to keep intact the basic structure of the book, the chapter plan has not been changed. Nevertheless, sufficient material has been added in Chapter 6, 'Fundamental and Technical Analysis' with a view to provide more insight into technical analysis. Several numerical illustrations have been added in different Chapters at appropriate places.

Inframarginal analysis represents a methodology that extends marginal analysis, using non-classical mathematical programming, in efforts to investigate corner solutions and indivisibilities. As such this approach has been used to reintroduce classical insights regarding the division of labor and economic organization to the mainstream of economic inquiry.

This volume collects selected papers on the European Union from the 13th Congress of the International Economic Association held in Lisbon, September 2002. It starts with an address by Romano Prodi, President of the European Commission, who sets the tone for the other papers by describing and evaluating two of the greatest accomplishments of the EU: economic and monetary union, and EU enlargement. Other authors deal in detail with various aspects of these and other issues, using a mixture

of theoretical, empirical, and other tools.

In this provocative study,
economist Ernesto Screpanti
argues that imperialism—far
from disappearing or mutating
into a benign
“globalization”—has in fact
entered a new phase, which
he terms “global imperialism.”
This is a phase defined by
multinational firms cut loose
from the nation-state
framework and free to chase
profits over the entire surface
of the globe. No longer
dependent on nation-states for

building a political consensus that accommodates capital accumulation, these firms seek to bend governments to their will and destroy barriers to the free movement of capital. And while military force continues to play an important role in imperial strategy, it is the discipline of the global market that keeps workers in check by pitting them against each other no matter what their national origin. This is a world in which the so-called “labor aristocracies” of the rich nations are demolished, the power of states to enforce checks on capital is sapped, and global firms are free to pursue their monomaniacal

quest for profits unfettered by national allegiance. Screpanti delves into the inner workings of global imperialism, explaining how it is different from past forms of imperialism, how the global distribution of wages is changing, and why multinational firms have strained to break free of national markets. He sees global imperialism as a developing process, one with no certain outcome. But one thing is clear: when economic crises become opportunities to discipline workers, and when economic policies are imposed through increasingly authoritarian measures, the vision of a democratic and

humane world is what is ultimately at stake.

Free trade lies at the heart of the new era of globalization. This superb account explains the theory of free trade and how it has been put into practice. The author reviews the history of 20th century trade agreements. He traces what happened to GATT, with its quite narrow ambit, before

the USA pushed the world into the Uruguay Round. He also examines the benefits and hidden costs of the WTO Agreements in both economic and non-economic terms.
