Extract from the

Preface: '1. What

the book coversThis

---

book is about day trading. Using the price action itself, rather than any of the usual array of indicators based on it. The US 30-year Treasury Bond Futures is the favoured instrument - the T-Bonds, as they are commonly called. There are good reasons for choosing this instrument to learn to trade - one being that they do not require a detailed knowledge of bonds themselves. The other attractions, whether you are a beginner or a seasoned veteran, are to do with liquidity, range, behaviour, patterns and the price action displayed at the key support and resistance points it encounters. Most days the T-bonds offer trading opportunities which can be taken within a money management environment that can give you an edge for profit - and this book has been designed to show you how to do just that. Fully illustrated with charts taken from a live trading screen and displayed in exactly the way you would have seen them for yourself, on your computer monitor. What you see is not just

---

what happened, in detail, but also clear evidence of just how you could have profited yourself from each trading situation.2. Who the book is forThis book has been written for anyone wishing to day trade, using a discretionary method, rather than a mechanical system. It is a learning tool which should commend itself to the experienced trader, as much as to someone new to this business. Certainly I hope that any raw recruit would find it an easy read, even if it took a

while longer to digest the subject matter as a whole.3. How the book is structuredThe seasoned trader will probably start by skip reading, to see if he can cut to the chase quickly. The lessexperienced will immediately see - from the detail of the charts alone - that there is a great deal of info

Data Structures and Abstractions with Java is suitable for one- or two-semester courses in data structures (CS-2) in the departments of Computer Science, Computer Engineering, Business, and Management Information Systems. This book is also useful for programmers and software engineers interested in learning more about data structures and abstractions. This is the most student-friendly data

---

structures text available that introduces ADTs in individual, brief chapters -- each with pedagogical tools to help students master each concept. Using the latest features of Java, this unique object-oriented presentation makes a clear distinction between specification and implementation to simplify learning, while providing maximum classroom flexibility. Teaching and Learning Experience This book will provide a better teaching and learning experience--for you and your students. It will help: Aid comprehension and facilitate teaching with an approachable format and content organization: Material is organized into small segments that focus a reader's attention and provide greater instructional flexibility. Support learning with student-friendly pedagogy: In-text and online features help students master the

material.

## Nikon Camera Repair Handbook Applewood Books

This book is an excellent learning tool for both the beginner who has no knowledge of music theory, and the intermediate student looking to improve their understanding of the guitar fretboard. an easy to understand music theory section is included especially for the beginning student, which sets forth the basics of music theory, thus laying the foundations for the exercises. from the most simple construction of basic intervals to the most advanced chord structure, all

---

information is consistently applied to the guitar fretboard. the exercises prompt the student to write out an example using staff notation, and then to find those notes on a guitar fretboard diagram. All answers are included in the book, enabling the student to check his or her own work

Jesus willingly endured unimaginable depths of suffering for his friends. John 13:1 says he loved us to the uttermost. To love to the uttermost is to love freely, without reserve or limit, and without flaw or failure. As we journey with Jesus for eight days-from Palm Sunday to Easter Sunday-from triumphal entry, to arrest and trial, to

death and burial and triumphant resurrection, we gaze on a God-man who begrudges no pain or reproach on his pathway to redeem lost sinners. Here is the one who "humbled himself by becoming obedient to the point of death, even death on a cross" (Philippians 2:8). In *Love to the Uttermost: Devotional Readings for Holy Week*, John Piper calls you to fix your eyes steadily on Jesus as he loves you to the uttermost.
