"Preface How do the themes of traditions and encounters help make sense of the entire human past? World history is about both diversity and connections. We began this text with a simple goal: to help our students understand the unique histories of the world's rich variety of peoples while allowing them to see the long histories of connections and interac-tions that have shaped all human communities for millennia. To do this, we have written a story around the dual themes of tradi-tions and encounters, so that we can highlight the many different religions and customs embraced by the world's peoples while also exploring the encounters with other cultures that brought about inevitable change"--

For many tabletop RPG players, the joy of an in-depth game is that anything can happen. Typical adventure modules include a map of the adventure’s primary location, but every other location?whether it's a woodland clearing, a random apothecary or the depths of a temple players elect to explore?has to be improvised on the fly by the Game Master. As every GM knows, no matter how many story hooks, maps or NPCs you painstakingly create during session prep, your best-laid plans are often foiled by your players' whims, extreme skill check successes (or critical fails) or their playful refusal to stay on task. In a game packed with infinite possibilities, what are GMs supposed to do when their players choose those for which they're not prepared? The Game Master’s Book of Random Encounters provides an unbeatable solution. This massive tome is divided into location categories, each of which can stand alone as a small stop as part of a larger campaign. As an example, the “Taverns, Inns, Shops & Guild Halls” section includes maps for 19 unique spaces, as well as multiple encounter tables designed to help GMs fill in the sights, sounds, smells and proprietors of a given location, allowing for each location in the book to be augmented and populated on the fly while still ensuring memorable moments for all your players. Each map is presented at scale on grid, enabling GMs to determine exactly where all of the characters are in relation to one another and anyone (or anything) else in the space, critical information should any combat or other movement-based action occur. Perhaps more useful than its nearly 100 maps, the book's one-shot generator features all the story hooks necessary for GMs to use these maps as part of an interconnected and contained adventure. Featuring eight unique campaign drivers that lead players through several of the book's provided maps, the random tables associated with each stage in the adventure allow for nearly three million different outcomes, making The Game Master's Book of Random Encounters an incredible investment for any would-be GM. The book also includes a Random NPC Generator to help you create intriguing characters your players will love (or love to hate), as well as a Party Makeup Maker for establishing connections among your PCs so you can weave together a disparate group of adventurers with just a few dice rolls. Locations include taverns, temples, inns, animal/creature lairs, gatehouses, courts, ships, laboratories and more, with adventure hooks that run the gamut from frantic rooftop chases to deep cellar dungeon-crawls, with a total of 97 maps, more than 150 tables and millions of possible adventures. No matter where your players end up, they'll have someone or something to persuade or deceive, impress or destroy. As always, the choice is theirs. But no matter what they choose, with The Game Master's Book of Random Encounters, you'll be ready.

This book offers a geographically unique cultural comparative lens to examine the issue of transnational curriculum knowledge (re)production. Prompted by the ongoing competency-based curriculum reforms on a global scale, this book examines where global frameworks like the OECD's core competency definitions are rooted and how they are borrowed, resisted, and/or re-contextualized in various European states with a Christian, foremost Protestant educational–cultural heritage and Asian countries with a Confucian educational–cultural heritage. It highlights the roles that various factors, such as history, culture, religious attitudes, ideology, and state governance play in nation-states' re-contextualization of global curriculum policies and practices beyond a simplistic and dualistic globalism/power and nationalism/resistance dynamic. In doing so, it provides a global context to better understand individual nation-state’s continuing curriculum reforms and school practices. At the same time, it situates individual nation-state’s latest curriculum reforms and practices within an international community for healthy dialogues and mutual sharing. By selecting two educational–cultural systems and wisdom—Christian-Protestant and Confucian—it also offers a springboard for international curriculum studies beyond the usual confinement of geopolitical nation-state constructs. It not only sheds new light on each nation-state’s curriculum policies and practices, but also creates new collaboration spaces within similar and across disparate cultural–educational regions. With its wide geopolitical and educational–cultural scope, this book appeals to a global market and can be used in a variety of undergraduate and graduate courses in comparative education, history of education, curriculum theory, school and society, and curriculum history.

The Negro Motorist Green Book was a groundbreaking guide that provided African American travelers with crucial information on safe places to stay, eat, and visit during the era of segregation in the United States. This essential resource, originally published from 1936 to 1966, offered a lifeline to black motorists navigating a deeply divided nation, helping them avoid the dangers and indignities of racism on the road. More than just a travel guide, The Negro Motorist Green Book stands as a powerful symbol of resilience and resistance in the face of oppression, offering a poignant glimpse into the challenges and triumphs of the African American experience in the 20th century.

Mixed Blessings transforms our understanding of the relationship between Indigenous people and Christianity in what is now Canada. While acknowledging the harm of colonialism, including the trauma inflicted by church-run residential schools, this book challenges the portrayal of Indigenous people as passive victims of malevolent missionaries who experienced a uniformly dark history. Instead, it illuminates the diverse and multifaceted ways that Indigenous communities and individuals across Canada have interacted, and continue to interact, meaningfully with Christianity from the early 1600s to the present. Ranging widely across time and place, these insightful case studies explore how and why some Indigenous people – including Louis Riel and Edward Ahenakew – historically aligned themselves with Christianity while others did not. It also plumbs the processes and politics involved in combining spiritual traditions and reflects on the role of Christianity in Indigenous communities today.

Alice in Wonderland McGraw-Hill Education
Winner of the 2015 Pulitzer Prize for History Encounters at the Heart of the World concerns the Mandan Indians, iconic Plains people whose teeming, busy towns on the upper Missouri River

were for centuries at the center of the North American universe. We know of them mostly because Lewis and Clark spent the winter of 1804-1805 with them, but why don't we know more? Who were they really? In this extraordinary book, Elizabeth A. Fenn retrieves their history by piecing together important new discoveries in archaeology, anthropology, geology, climatology, epidemiology, and nutritional science. Her boldly original interpretation of these diverse research findings offers us a new perspective on early American history, a new interpretation of the American past. By 1500, more than twelve thousand Mandans were established on the northern Plains, and their commercial prowess, agricultural skills, and reputation for hospitality became famous. Recent archaeological discoveries show how these Native American people thrived, and then how they collapsed. The damage wrought by imported diseases like smallpox and the havoc caused by the arrival of horses and steamboats were tragic for the Mandans, yet, as Fenn makes clear, their sense of themselves as a people with distinctive traditions endured. A riveting account of Mandan history, landscapes, and people, Fenn's narrative is enriched and enlivened not only by science and research but by her own encounters at the heart of the world.

The turn of the twentieth century witnessed the birth of two distinct philosophical schools in Europe: analytic philosophy and phenomenology. The history of 20th-century philosophy is often written as an account of the development of one or both of these schools, as well as their overt or covert mutual hostility. What is often left out of this history, however, is the relationship between the two European schools and a third significant philosophical event: the birth and development of pragmatism, the indigenous philosophical movement of the United States. Through a careful analysis of seminal figures and central texts, this book explores the mutual intellectual influences, convergences, and differences between these three revolutionary philosophical traditions. The essays in this volume aim to show the central role that pragmatism played in the development of philosophical thought at the turn of the twentieth century, widen our understanding of a seminal point in the history of philosophy, and shed light on the ways in which these three schools of thought continue to shape the theoretical agenda of contemporary philosophy.

In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh “Boom” Trenchard of Great Britain and William “Billy” Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet’s central vision-that command of the air is all important in modern warfare-has

been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

Based on Bentley and Ziegler's best-selling, comprehensive survey text, "Traditions & Encounters: A Brief Global History" provides a streamlined account of the cultures and interactions that have shaped world history. An effective part structure organizes developments into seven eras of global history, putting events into perspective and creating a framework for cross-cultural comparisons, while the strong themes of traditions (the formations and development of the world's major societies) and encounters (cross-cultural interactions and exchanges) bring focus to the human experience and help turn the giant story of world history into something more manageable. With an engaging narrative, visual appeal, extended pedagogy, and a strong emphasis on critical thinking, this concise version offers enhanced flexibility and affordability without sacrificing the features that have made the complete text a favorite among instructors and students alike.

A new analytical perspective on stones and stone masters across Southeast Asia that extends and deepens the recent literature on animism. Stones and stone masters are an important focus of animist religious practice in Southeast Asia. Recent studies on animism see animist rituals not as a mere metaphor for community or shared values, but as a way of forming and maintaining relationships with occult presences. This book features city pillars, statues, megaliths, termite mounds, mountains, rocks found in forests, and stones that have been moved to shrines, as well as the territorial cults which can form around them. The contributors extend and deepen the recent literature on animism to form a new analytical perspective on these cults across mainland Southeast Asia. Not just a collection of exemplary ethnographies, Stone Masters is also a deeply comparative volume that develops its ideas through a meshwork of regional entanglements, parallels, and differences, before entering into a dialogue with debates on power, mastery, and the social theory of animism globally.

Scholars have long known that world music was not merely the globalized product of modern media, but rather that it connected religions, cultures, languages and nations throughout world history. The chapters in this History take readers to foundational historical moments – in Europe, Oceania, China, India, the Muslim world, North and South America – in search of the connections provided by a truly world music. Historically, world music emerged from ritual and religion, labor and life-cycles, which occupy chapters on Native American musicians, religious practices in India and Indonesia, and nationalism in Argentina and Portugal. The contributors critically examine music in cultural encounter and conflict, and as the critical core of scientific theories from the Arabic Middle Ages through the Enlightenment to postmodernism. Overall, the book contains the histories of the music of diverse cultures, which increasingly become the folk, popular and classical music of our own era.

This work investigates the early encounters of French philosophers and religious thinkers with the phenomenological philosophy of Edmund Husserl. Following an introductory chapter addressing context and methodology, Chapter 2 argues that Henri Bergson's insights into lived duration and intuition and Maurice Blondel's genetic description of action functioned as essential precursors to the French reception of phenomenology. Chapter 3 details the presentations of Husserl and his followers by three successive pairs of French academic philosophers: Léon Noël and Victor Delbos, Lev Shestov and Jean Hering, and Bernard Groethuysen and Georges Gurvitch. Chapter 4 then explores the appropriation of Bergsonian and Blondelian phenomenological insights by Catholic theologians Édouard Le Roy and Pierre Rousselot. Chapter 5 examines applications and critiques of phenomenology by French religious philosophers, including Jean Hering, Joseph Maréchal, and neo-Thomists like Jacques Maritain. A concluding chapter expounds the principal finding that philosophical and theological receptions of phenomenology in France prior to 1939 proceeded independently due to differences in how Bergson and Blondel were perceived by French philosophers and religious thinkers and their respective orientations to the Cartesian and Aristotelian/Thomist intellectual traditions.

More than three decades after its first publication, Edward Said's groundbreaking critique of

the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains one of the most important books written about our divided world.
