Over a million students at thousands of schools have learned about world history with the best selling book for the course, Traditions and Encounters: A Global Perspective on the Past. Using the twin themes of traditions and encounters, the text emphasizes both the distinctive patterns of historical development within individual societies and the profound results of interactions between different societies. Exploring the historical record of cross-cultural interactions and exchanges, Traditions and Encounters places the world of

contemporary globalization in historical context. The book helps students understand the world ' s major societies and shows how the interactions of these societies affect history throughout the world. The authors tell a coherent and digestible story of the past that is not weighed down by excessive detail, so instructors are able to incorporate additional readings. This edition provides an updated map program as well as the latest scholarship. It also moves Primary Source Investigator online, improving access for students to work with primary sources.

Buddhism: Introducing the Buddhist Experience, Second Edition, focuses on the depth of Buddhist experience as expressed in the teachings and practices of its religious and philosophical traditions. Taking a broad and inclusive approach, this unique work spans over 2,500 years, offering chapters on Buddhism's origins in India; Theravada and Mahayana Buddhism; and Buddhism in Southeast Asia, Tibet, China, Korea, and Japan. It also includes an extensive discussion of modern, socially engaged Buddhism and a concluding chapter on the spread of Buddhism to the West. Author Donald W. Mitchell provides substantial selections of primary text material throughout that illustrate a great variety of moral, cultural, psychological, meditative, and spiritual Buddhist experiences. Buddhism features twenty-two boxed personal narratives by respected Buddhist leaders and scholars, including His Holiness the Dalai Lama, Dharma Master Sheng Yen, Dharma Master Cheng Yen, Jeffrey Hopkins, Sulak Sivaraksa, Rita M. Gross, Chatsumarn Kabilsingh, and Robert Aitken. The text also includes photographs, maps, a pronunciation guide, and a glossary of technical terms. Integrating more information about how Buddhism is actually practiced around the world today, the second edition adds six brief end-of-chapter essays by scholars and practitioners on cultural experiences of Buddhism in Thailand, Tibet, China, Korea, Japan, and America. Ideal for courses in Buddhism, Asian religions, and Asian philosophy, this edition also offers additional photographs, new sections on topics like Buddhist cosmology, expanded coverage of Buddhism and globalization, and updated suggestions for further reading.

A User's Guide McGraw-Hill Education
More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains one of the most important books written about our divided world.

In Seeking Allah, Finding Jesus, now expanded with bonus content, Nabeel Qureshi describes his dramatic journey from Islam to Christianity, complete with friendships, investigations, and supernatural dreams along the way. Providing an intimate window into a loving Muslim home, Qureshi shares how he developed a passion for Islam before discovering, almost against his will, evidence that Jesus rose from the dead and claimed to be God. Unable to deny the arguments but not wanting to deny his family, Qureshi struggled with an inner turmoil that will challenge Christians, Muslims, and all those who are interested in the world's greatest religions. Engaging and thought-provoking, Seeking Allah, Finding Jesus tells a powerful story of the clash between Islam and Christianity in one man's heart?and of the peace he eventually found in Jesus. "I have seldom seen such genuine intellect combined with passion to match ... truly a 'must-read' book."—Ravi Zacharias

The most academically credible case for alien visitation. Is the existence of civilisation on earth the result of contact from inhabitants of a planet in the system of the star Sirius prior to 3000BC?

There are tribal cultures in present-day Africa whose most sacred and secret traditions are based on this theory. Central to their cosmology is a body of knowledge concerning the system of the star Sirius that is astounding in its accuracy of detail, including specific information only recently accessible to modern science. Robert Temple traces the traditions of the Dogon and three related tribes back 5,000 years to the ancient Mediterranean cultures of Sumer and Egypt. He shows a knowledge dependent on physics and astrophysics, which they claimed was imported to them by visitors from Sirius.

Traditions & Encounters: A Brief Global History McGraw-Hill College

An introductory text that shows that reason and Christian belief are compatible and mutually supportive, and that both can lead to the truth. The central aim of Reason, Faith, and Tradition is to show that reason and Christian belief are in fact not contradictory, but are simply two different orientations, two different ways of looking at the world, and that both can lead to truth. In the end they cannot be separated. Here students see that a faith-based approach to theology is wholly compatible with a historical and critical approach. Topics covered include faith and reason; science and religion; Revelation; Scripture; the Trinity; Christian anthropology; Christology; the Last Things and Salvation; and the Roman Catholic Church. Provides an overview of Christian and Catholic Theology. Equips students with the basic skills they need to begin answering theological questions on their own. Lays the foundation for deeper study.

"Basic Ethics presents for a wide range of students and other interested readers the questions raised in thinking about ethical problems, the answers offered by moral philosophy, and the means to better integrate both into the reader's world and personal life. It takes up what the author calls a "worldview theory," which shows readers how to begin with the values and understanding of the world that they already possess in order to transition from there to new levels of increasing ethical awareness. Updates to the Third Edition include the more thorough integration of feminist ethics into the principal theoretical traditions, a new chapter on the ethical responsibility to be well informed of current events, expanded coverage of human rights, and additional opportunities on how to use ethical reasoning in thinking about one's own life and about public policy"--

This extensively revised, restructured, and updated edition continues to present an engaging and comprehensive introduction to the subject, exploring the world's landforms from a broad systems perspective. It covers the basics of Earth surface forms and processes, while reflecting on the latest developments in the field. Fundamentals of Geomorphology begins with a consideration of the nature of geomorphology, process and form, history, and geomorphic systems, and moves on to discuss: structure: structural landforms associated with plate tectonics and those associated with volcanoes, impact craters, and folds, faults, and joints process and form: landforms resulting from, or influenced by, the exogenic agencies of weathering, running water, flowing ice and meltwater, ground ice and frost, the wind, and the sea; landforms developed on limestone; and landscape evolution, a discussion of ancient landforms, including palaeosurfaces, stagnant landscape features, and evolutionary aspects of landscape change. This third edition has been fully updated to include a clearer initial explanation of the nature of geomorphology, of land surface process and form, and of land-surface change over different timescales. The text has been restructured to incorporate information on geomorphic materials and processes at more suitable points in the book. Finally, historical geomorphology has been integrated throughout the text to reflect the importance of history in all aspects of geomorphology. Fundamentals of Geomorphology provides a stimulating and innovative perspective on the key topics and debates within the field of geomorphology. Written in an accessible and lively manner, it includes guides to further reading, chapter summaries, and an extensive glossary of key terms. The book is also illustrated throughout with over 200 informative diagrams and attractive photographs, all in colour.

Traditions & Encounters: A Global Perspective on the Past McGraw-Hill Europe

This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease,

to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.
