The traffic signs manual gives guidance on the use of traffic signs and road markings prescribed by the Traffic Signs Regulations and covers England, Wales, Scotland and Northern Ireland.

Traffic Signs Manual - Chapter 1 Introduction

6.5 Bi-directional road studs may be used for certain applications on single carriageway roads, including the double white lines in diagrams 1013.1, 1013.3 and 1013.4 (subject to the exception described in para 5.12), and should always be used in a line that separates opposing flows of traffic. They are not appropriate for marking lines bounding central hatched markings; these should make use of the uni-directional type.

This is the re-purposed Chapter 6 that will revolutionise the use of traffic signals in urban areas now that the over-designed monstrosity that is the old DMRB TD 42/95 (now CD 123) has been stripped back to apply to major roads with speed limits in excess of 40 mph. Chapter 6 forms the basis

for all urban signal design as a result now.
