A multi-fit trailer hitch is an adjustable trailer hitch option if a custom hitch is not available for your vehicle. Although multi-fit hitches do not offer the same fully integrated design as a custom trailer hitch, they are optimized for towing strength and fitment.

[Hitching Made Easy | Trailer Life](#)

There are many different types of hitches used for towing a trailer. Receiver hitches are perhaps the most common, divided into five classes. Some of the other hitch types include 5th wheel hitches and gooseneck hitches. Each type of trailer hitch has a unique purpose and coupling style, as well as its own set of capacities and sizes.

This plate is attached to your trailer's skid plate. When you're hooked up into your SuperGlide hitch and ready to tow, it isolates the rotation of your trailer's king pin in the hitch. Movement and rotation is then transferred to the automatic cam action of your SuperGlide hitch, moving it away from the cab along its rails to prevent the trailer from contacting the cab of your truck!
