There are many aspects when managers are identifying training needs of their team members. Firstly, the managers need to identify what skill set is required to complete the job or the process. Second, is to assess existing skill levels of the team members, and lastly, determine the training gap. Training gap is defined as the difference between the skills required to complete the job and existing skill set of any particular team member.

Chapter 3: We look at task
analysis and individual needs.
Training needs analysis is a
process that a business goes
through in order to determine
all the training that needs to be
completed in a certain period to
allow their team to complete
their job as effectively as
possible, as well as progress and
grow. There are 3 key steps

involved in training needs
analysis to ensure your business
is making the most of the
process:
