The Fourth Edition of this unique casebook has been dramatically revised. This new edition presents the important cases, statutes, empirical data, and competing tort theories in a problems-oriented format that is designed to help students acquire a sophisticated understanding of tort law through active learning. As before, the text includes a large number of problems. Now, however, the Problems, updated and considerably expanded, are organized in Sets at the end of each substantive chapter. This extensively re-written and

reorganized edition includes the classic common law torts cases, but is updated throughout with teachable, cutting-edge decisions that will demand student interest and hold their attention. Particular care has been to take account of the most recent commentaries on tort law, such as the growing importance of the Restatement (Third) of Torts. Chapter One is unique among American torts casebooks in its examination of how the dominant twenty-first century tort theories influence judicial decisionmaking and scholarship. That chapter explains six key perspectives on tort law: • Law and Economics; • Corrective Justice; • Critical Race Theory; • Critical Feminism; • Pragmatism; and • Social Justice Chapter One references the famous McDonald's hot coffee litigation as a case study

to illustrate these perspectives in action. Subsequent chapters continue to work through that case study and continually reference the perspectives to explain or challenge the decided cases. The authors seek to provide students with innovative cases and problems, empowering them with practical skills. By exposing students to the most important contemporary tort law theories, the Fourth Edition of this casebook encourages students to go beyond passively memorizing case holdings and the voyeuristic experience of reading appellate opinions and truly gain perspectives on tort law. The United States Patents Quarterly Psychology Press During the past decade, the rise of online communication has proven to be particularly fertile ground for academic exploration at the intersection of law and society. Scholars have considered how best to apply existing law to new technological problems but they also have returned to first principles, considering fundamental questions about what law is, how it is formed and its relation to cultural and technological change. This collection brings together many of these seminal works, which variously seek to

---

interrogate assumptions about the nature of communication, knowledge, invention, information, sovereignty, identity and community. From the use of metaphor in legal opinions about the internet, to the challenges posed by globalization and deterritorialization, to the potential utility of online governance models, to debates about copyright, free expression and privacy, this collection offers an invaluable introduction to cutting-edge ideas about law and society in an online era. In addition, the introductory essay both situates this work within the trajectory of law and society scholarship and summarizes the major fault lines in ongoing policy debates about the regulation of online activity.
